SUBJECT INDEX—ABSTRACTS—VOLUME 84

ABDOMEN, Nutritional allergy of, from surgical standpoint, 56; important dividing wall between caudal herniation and prolapse of viscera of, or pelvis, 72; thoracoabdominal casualty, 135; management of wounds of thorax and of thorax and, in forward areas in Sicilian and Italian campaigns, 136; fundamentals of technique in transverse incision of, 141; delayed healing of wounds of, due to food allergy, 184; why hernias occur, 243; observations on nonspecific lymphadenitis of, 253; rare case of hemoperitoneum, 254; initial surgery of thoracoabdominal war injuries, 325; resection of carcinoma of, involving liver and spleen secondarily, 334; cholecystoduodenocolic membrane, 335; treatment of penetrating wounds of, in civilian practice, 336; war wounds of; review of 131 cases, 337; 524 wounds of, on Western Front, 338; surgical treatment of ascites, 339; unnecessary operations on, for pathological lesions of genitourinary tract, 340; retrograde aortography of; contribution to study of abdominal aorta and iliac arteries, 396; symptomatic epilepsy of, 449

Abdominal wall, Inguinal hernia; unpredictable result, 440; transplantation of dermis in treatment of eventrations, 440

Abortion, Analysis of maternal deaths for 12 years in Monroe County, including Rochester, 159; etiology of spontaneous, excepting syphilis, 563

Abscess, Studies in lung, 433; perinephritis and perirenal, 463

Accidents in childhood, 586

Acetaminofluorene, Influence of sex hormones upon hepatic lesions produced by, 399

Achalasia, Treatment of patients with, by esophagogastrostomy, 57

Acids, Antisepsis and disinfection in surgery; collective review, 107

Acroparesthesia, 192

Acrylics, Uses of plastics in surgery, 402

Actinomycosis, Pulmonary, 317; of testicle, 469

Adamantinoma of maxillary sinus with report of 2 cases, 45

Addison's disease successfully treated by graft, 351

Adenocarcinoma, Mucocellular papillary, of lung and lobectomy, 237

Adenoids, Hemostasis after operations for, 422

Adenolymphomas, Histogenetic study of, 104

Adenoma, Parathyroid; study of 322 cases; collective review, 1; sudoriparous, of female genitalia, 72; bronchial, 538

Adenomatosis, Pulmonary, 434

Adenomyosis of uterus; study of 52 reported cases and review of literature, 342

Adrenal glands, Paroxysmal hypertension caused by tumor of medulla of, 80; clinical picture and treatment of pheochromocytomas of, 263; function of, in pregnancy, 296; Addison's disease successfully treated by graft, 351; factors affecting survival in rats which have been deprived of, 400

Air, Technical uses of, in ophthalmology, 122; arthrography with, as aid to diagnosis of lesions of menisci of knee joint, 190

Albright's syndrome, Case of; osteitis fibrosa disseminata, 361

Alcohols, Antisepsis and disinfection in surgery; collective review, 107

Aldehydes, Antisepsis and disinfection in surgery; collective review, 107

Alkalies, Antisepsis and disinfection in surgery; collective review, 107; burns of eye due to; clinical and pathologic course, 222

Allergy, Delayed healing of abdominal wound due to food, 184; vascular basis of, of eye and its adnexa, 418

Amebiasis, Surgical complications of, 252; of cecum; clinical and radiological aspects, 550

Amino acids, Reactions to intravenously administered; casein hydrolysates, 283

Ampulla of Vater, Cholangiography in compression or stricture of distal portion of common bile duct with remarks upon diagnosis and therapy of carcinoma of, 145

Amputation, Conservation of short stumps following, by tendon section, 91; neurectomy to produce atrophy of stump of, 476; further review of interinnomino-abdominal operation based on 21 personal cases, 485

Anatomy, Graphic approach to complete, 298

Androblastoma, Arrhenoblastoma, 452

Anemia, Studies on peripheral blood picture during pregnancy and so-called, of pregnancy, 74; of thermal burns, 486

Anesthesia, Analysis of 500 obstetrical cases managed under continuous caudal, with pontocaine, 157; aspiration of stomach contents into lungs during obstetric, 158; observations on carbohydrate metabolism during prolonged pentothal, in dogs; blood sugar and liver glycogen, 187: experience with curare in, 187; nitrous oxide-cyclo-propane-curare; 200 cases, 188; differential spinal block, 189; stages and signs of pentothal; physiological basis, 287; intravenous procaine for obstetrical, 287; neurological complications of spinal, 389; management of so-called "normal" delivery by obstetrician, 455; effect of pentothal alone and in combination with oxygen or nitrous oxide-oxygen on arterial blood gases, 489; resuscitation and, 490; headaches after spinal, and technique for lessening their frequency, 491; in surgical treatment of congenital pulmonic stenosis, 491; premedication in infants and children, 590; nitrous oxide oxygen, 590; intraosseous, in man, 591

Anesthetic, Seconal as basal, in children, 186

Aneurysm, Of renal artery following partial nephrectomy, 82; arteriovenous fistulas and arterial, in military personnel, 94; cirsoid, of scalp, 95; surgical problem of intracranial, and related vascular lesions, 128; incisions in surgery of, 375; experiences with operative treatment of, and of pulsating hematoma from 1941 to 1946, 479; arterial repair in treatment of, and arteriovenous fistulas, 479

Animals, Studies on effects of tissue extracts of adult, on wound healing, 504

Ankle, Para-articular ossification of soft parts of; complication of sprain with or without fracture of shaft of ipsilateral fibula, 364

Anthrax, Diagnosis and treatment, 181; cutaneous, 181

Antibiotics, Antisepsis and disinfection in surgery; collective review, 107

Antiseptics, Influence of local, on regeneration of corneal epithelium of rabbits, 123

Aorta, Technical considerations in surgical therapy for coarctation of, 54; thrombosis of iliac arteries and bifurcation of, 176; anastomosis of, to pulmonary artery, 375

Aortography, Retrograde abdominal; contribution to study of abdominal aorta and iliac arteries, 396

Appendectomies, Normal appendices in one thousand, 334

Appendicitis, Histological diagnosis of, 144; relation between appendical carcinoid and, 442; review of 936 cases at Cincinnati General Hospital, 551; acute, in aged, 551; and sterility, 559
Appendix, Study of pathological associations between internal genitalia and, 345
Arachnoiditis, Optochiasmatic, 495
Arm, Muscle transplantation for paralysis of radial nerve, 172; fractures of upper end of radius, 172; obstetrical paralysis of upper limb, 261; treatment of bone defects of upper extremities in war casualties, 274; Volkmann's contracture of upper extremity; technique of explorative operation, 472; contribution to pathogenesis of Volkmann's ischemic paralysis, 573; contusion of humeral artery; spasm of vessels; Volkmann's syndrome, 573; screwing ruptured tendon of long portion of brachial biceps into diaphysis of humerus, 576; study of supination and pronation, with especial reference to treatment of forearm fractures, 578
Arrhenoblastoma, Androblastoma, 452
Arteries, War wounds of, 174; technique of immediate restoration of vascular continuity after wounds of, 175; thrombosis of iliac, and bifurcation of aorta, 176; surgical treatment of severe epistaxis in relation to ethmoidal, 315; statistical record on surgical treatment of obliterative disease of, of extremities, 481; arterial injuries of thorax, 543
Arteriography in renal diagnosis, 566
Arteritis, Temporal; report of case and comparison with respect to periarteritis nodosa, 582
Artery, Cervical rib; role of clavicle in occlusion of subclavian, 93; acute thrombosis of superior mesenteric; recovery following extensive resection of small and large intestines, 147; pulmonary; its ramifications and relations, 233; large emboli of pulmonary, 233; prognosis and treatment of large emboli of pulmonary, 382; contusion of humeral; spasm of vessels; Volkmann's syndrome, 573
Arthrodesis, Experiences with Brittain ischiofemoral, 91; of subtalus and midtarsal joints of foot, 474
Arthrography, Air, as aid to diagnosis of lesions of menisci of knee joint, 190
Arthroplasty, Results of, of finger joints, 474
Ascites, Surgical treatment of, 339
Ascorbic acid, Riboflavin, thiamin, and nicotinic acid in relation to severe injury, hemorrhage, and infection in human, 502; metabolism of, after trauma, 597
Asphyxia, Transfusion and autotransfusion of oxygenated blood in treatment of, electrocution, drowning, and carbon monoxide poisoning, 583
Asthma, Pulmonary reaction following intrabronchial instillation of lipiodol in bronchial, 593
Astragalus, Circumscribed osteochondritis of, 364

BED, Use of routine exercises in, following major surgery, 177
Behcet's disease, Posterior ring abscess of metastatic origin in, 527
Benadryl, Irradiation sickness; histamine effect treated with, 190
Beta-ray therapy, Dose measurement in, 499
Bile ducts, Nonsurgical cholangiography in vesicular lithiasis, 68; concerning cholangiography in compression or stricture of distal portion of common, with remarks upon diagnosis and therapy of carcinoma of ampulla of Vater, 145; management of stone in common, missed at operation, 252; common; surgery of pancreatic portion, 446; pancreatitis as cause of complete obstruction of common, 448
Biliary tract, Prevention of hemorrhagic complications in surgery of, by vitamin K, 146; congenital malformations of extrahepatic, with subhepatic obstructive jaundice, 251; new roentgen sign in extrahepatic disease of, 290; clinical contribution to study of relationship between stasis in, and hepatic lesions, 334; treatment of postoperative dyskinesia, 445; common bile duct; surgery of pancreatic portion, 446; pancreatitis as cause of complete obstruction of common duct, 448; clinical study of normal and pathologic motor activity of gall bladder; preliminary report, 594
Bite, Fibrosarcoma of Darier occurring after wound from, 296
Bladder, Histopathological and pathogenic study of chronic pericystitis, with special regard to lesions of terminal end of ureter, 84; gunshot wounds of urinary, in war time, 84; treatment of functional traumatic incontinence of, and vesicovaginal fistula at Allmänna BB, 153; repair of defects and fistulas in urinary, 162; new medium for cystourethrography, 265; value of operation of Halban in treatment of genital prolapse in presence of large cystocele, 341; unrecognized vesical neck obstruction in women, 345; treatment of injuries of spinal cord; collective review, 403; vesicoureteral reflux, 465; trauma of cystostomy by instrument, 466; traumatic rupture of, and posterior urethra; 4 observations, 466; acute interstitial cystitis, 467; carcinoma of, 467; total cystectomy, 467; management of cord, by transurethral resection, 568; roentgen diagnosis of diseases of neck of, 594
Blastomycosis, Association of Brazilian, and tuberculosis in glandular lesions, 282
Bleeding time in human beings; its utilization for diagnostic and pharmacodynamic purposes, 105
Blood, Experimental appendical peritonitis; prognostic significance of certain hematological factors, especially prothrombin time, 63; studies on peripheral picture of, during pregnancy and so-called anemias of pregnancy, 74; subcutaneous heparin in anticoagulation therapy, 97; bleeding time in human beings; its utilization for diagnostic and pharmacodynamic purposes, 105; infectious lymphadenosis (mononucleosis) and thrombocytopenia purpura; recovery after splenectomy; report of case, 147; rupture of spleen in infectious mononucleosis, 147; postoperative changes in, with regard to shock, 178; observations on carbohydrate metabolism during prolonged pentothal anesthesia in dogs; sugar in, and liver glycogen, 187; roentgen therapy for leucemia, 191; studies on streptomycin; assay in body fluids, 192; studies on streptomycin; levels in, and urinary excretion in man and animals, 192; platelet counts and platelet function, 281; rationale of sedimentation rate of, 294; sternal marrow studies in thyrotoxicosis treated with thiouracil and review of literature regarding thiouracil effects on, 310; investigations of permeability of placenta with help of elliptocytes, 349; investigations on permeability of placenta with aid of red corpuscles of, tagged with radioactive phosphorus, 349; pseudohemophilia, 376; pseudohemophilia; case study, 377; demonstration of Rh antibodies in newborn and further evidence of pathogenesis of erythroblastosis, 377; preservation of normal human plasma in liquid state; clinical, chemical, and physicochemical studies during 3 years of storage at room temperature, 379; anticoagulant effect of hydroxycoumarin in vivo; its value and use in surgery, 383; present status of transfusion of whole, and its derivatives in obstetrics and gynecology, 455; fetal erythroblastosis, 461; effect of various doses of ultraviolet rays on, of infants, 481; studies on transfusion of; survival

of fresh and stored transfused erythrocytes as determined by urobilinogen excretion, 481; effect of pentothal alone and in combination with oxygen or nitrous oxide-oxygen on arterial gases of, 489; observations on fibrinolysis; plasminogen, plasmin, and antiplasmin content of human, 501; comparative efficacy of, from normal and from burned donors in experimental burns, 505; circulating thyroid hormone in blood and lymph, 530; antepartum prediction of hemolytic disease of newborn, 565; transfusion and autotransfusion of oxygenated, in treatment of asphyxia, electrocution, drowning, and carbon monoxide poisoning, 583; loss of, in operations; statistical comparison of losses as determined by gravimetric and colorimetric methods, 584

Blood pressure, Effect of pentothal sodium on mean arterial, in presence of high spinal cord paralysis, 186; course of hypertension after nephrectomy for advanced unilateral renal disease; collective review, 299

Blood transfusion, Studies on; differentiation of hemolytic and nonhemolytic reactions to, 281; survival of fresh and stored transfused erythrocytes as determined by urobilinogen excretion, 481; comparative efficacy of blood from normal and from burned donors in experimental burns, 505; in treatment of asphyxia, electrocution, drowning, and carbon monoxide poisoning, 583

Blood vessels, Foreign bodies in, and in relation to the thoracic, and heart; migratory foreign bodies within blood vascular system, 54; morphology and variations of duodenal vasculature; relationship to problems of leakage from postgastrectomy duodenal stump, bleeding peptic ulcer, and injury to common duct, 60; multiple Perthes' test for segmental occlusion of deep veins, 93; arteriovenous fistulas and arterial aneurysms in military personnel, 94; ligation of inferior vena cava or iliac veins, 95; heparin in venous thrombosis, 98; disease resulting from use of pneumatic tools, 103; surgical problem of intracranial aneurysm and related vascular lesions, 128; use of tetraethylammonium in peripheral vascular disease and causalgic states, 129; ligation of ductus arteriosus, 138; patent ductus arteriosus and its surgical treatment, 138; of human endometrium, 149; war wounds of arteries, 174; technique of immediate restoration of vascular continuity after arterial wounds, 175; intra-arterial injections in treatment of endarteritis obliterans, 176; pulmonary artery; its ramifications and relations, 233; patent ductus arteriosus with subacute bacterial endarteritis; diagnosis and indications for operation, 238; late results of femoral thrombophlebitis and their treatment, 279; 2 additional cases of gangrene of limbs, of venous origin, 279; surgical treatment for dysphagia lusoria, 280; treatment of extremities following sudden failure of circulation, 294; pseudoembolic phlebitis (Grégoire's blue phlebitis), 374; incisions in surgery of aneurysms, 375; anastomosis of aorta to pulmonary artery, 375; prognosis and treatment of large emboli of pulmonary artery, 382; angiographic diagnosis of expanding intracranial lesions by vascular displacement, 390; retrograde abdominal aortography; contribution to study of abdominal aorta and iliac arteries, 396; sympathetic control of, of human skeletal muscle, 398; production of experimental portal hypertension in dog; anatomy of hepatic veins in dog, 401; vascular basis of allergy of eye and its adnexa, 418; surgically removed foreign body embolus in pulmonary artery, 435; Sudeck's atrophy, 477; experiences with operative treatment of aneurysm and of pulsating hematoma from 1941 to 1946, 479; arterial repair in treatment of aneurysms and arteriovenous fistulas, 479; venous surgery, 480; statistical record on surgical treatment of obliterative arterial disease of extremities, 481; studies on use of gelatin sponge or foam as hemostasic agent in experimental liver resections and injuries to large veins, 505; surgical treatment of congenital pulmonic stenosis, 538; diagnosis and treatment of tracheal and esophageal obstruction due to congenital vascular ring, 539; phlebothrombosis and thrombophlebitis in gynecology and obstetrics, 559; thrombosis of inferior vena cava, 581; exposure of, 581; temporal arteritis; report of case and comparison with respect to periarteritis nodosa, 582; diagnosis of pulmonary embolism and its treatment except by method of pulmonary embolectomy, 585; surgical treatment of pulmonary embolism, 585

Boeck's sarcoid; brief review and report of case in which diagnosis was made by bronchoscopic examination and biopsy, 236

Bogomoltz serum, Antireticular cytotoxic, in treatment of gastrointestinal diseases, 244; results in treatment of gynecologic and obstetric conditions with antireticular cytotoxic, (ACS), 256

Bone, Metastases in genital carcinoma, 73; anatomoclinical study of osteomalacic pelvis, 77; primary malignant tumors of, 87; absorbable gauze in surgery of, 89; surgery of hand, 89; problem of osteochondritis dissecans; cause of constant convexity of base of its niche and explanation of its frequent occurrence in cretinism, 167; origin and evolutionary cycle of giant cells of tumors of, (benign variety); preliminary communication, 168; combined roentgen radiation and surgical treatment of large benign giant cell tumors of, 172; treatment of defects of, in upper extremities in war casualties, 274; case of Albright's syndrome (osteitis fibrosa disseminata), 361; tenon and mortise grafts for bridging metacarpal defects due to gunshot wounds, 365; effect of innervation on mineral composition of; new experimental research, 368; orthopedic surgery in European theater of operations, 372; Paget's disease; statistical study of 82 cases, 471; costotransverse tuberculous osteoarthritis, 471; osseous manifestations of eosinophile granuloma; 9 cases, 472; changes in, of wrist in workers with pneumatic tools, 472; pseudarthroses with loss of, treated with flexible grafts of, and intramedullary wire, 474; radiotransparent stria of, and Looser-Milkman syndrome, 497; eosinophile granuloma of, 574

Bones, Multiple fractures in long, of infants suffering from chronic subdural hematoma, 276; infantile cortical hyperostoses, 362; fibrous dysplasia of single; monostotic fibrous dysplasia, 471

Brain, Early pneumoencephalographic findings following penetrating wounds of, 46; latent bronchial carcinoma with initial cerebellar symptoms, 53; use of laminography with encephalography in diagnosis of midline and subtentorial tumors of, 100; pretraumatic personality and psychiatric sequelae of head injury; correlation of multiple specific factors in pretraumatic personality and psychiatric reactions to head injury, based on analysis of 101 cases, 128; treatment of penetrating wounds of, produced by missiles of warfare, 128; surgical problem of intracranial aneurysm and related vascular lesions, 128; congenital encephalo-ophthalmic dysplasia, 223; cerebral concussion; histochemical demonstration of nucleases in cerebrospinal fluid, 229; Cushing's syndrome, 229; primary Hodgkin's sarcoma of, 230; management of war wounds of cranial cavity, 312; experimental study of subdural hematoma, 312; primary melanocytoblastoma of central nervous system, 312; gas embolism of; good effect of intravenous injection of novocain, 382; experience in ventriculog-

raphy of tumors below tentorium, 424; surgical treatment of syringobulbia and syringopontia; 2 cases, 425; observations on changes in states of mental depression and tension following surgical section of certain frontal lobe pathways, 426; experiences with cortical excisions for relief of intractable pain in extremities, 426; circulation of cerebrospinal fluid in Carassius gibelio, 430; porencephalia, 494; pacchionic granulations and hernias of, 533; primary intracranial neoplasms in military age group; World War II, 533; bilateral frontal lobe leucotomy, 533; eclampsia; report of case in which there was extensive destruction of, 562

Breast, Untreated carcinoma of, 50; artificial menopause and cancer of, 50; use of testoterone propionate in treatment of advanced carcinoma of, 51; associated neoplasms of genitomammary spheres, 72; two-stage mastopexy in plastic surgery of markedly enlarged, 131; granular cell myoblastoma of mammary gland, 131; mastectomy for gynecomastia through semicircular intra-areolar incision, 317; tumor dosage and results in roentgen therapy of cancer of, 395; Brodie's disease of, 431; operative correction of hypertrophy and ptosis of female; 300 cases, 431; effect of progesterone on development of cancer of, in C_3H mice, 503; tuberculosis of, 537; 5 cases of sarcoma of female, 537

Brittain arthrodesis, Experiences with, of ischiofemoral joint, 91

Broad ligament, Neoplasms of; critical review of literature with report of 3 cases, 559

Brodie's disease of breast, 431

Bronchi, Adenoma of, 538

Brow presentation, Study of mechanism of delivery in, 76

Burns, Experimental study of pathogenesis of general syndrome of, 99; importance of whole blood transfusions in management of severe, 182; metabolic alterations following thermal; effect of altering nitrogen and caloric intake or of administering testosterone propionate on nitrogen balance, 192; alkali, of eye; clinical and pathologic course, 222; mustard gas, of human eyes, 222; skin grafting dorsum of hand after, 283; plasma alpha amino nitrogen levels in patients with thermal, 284; wartime activities of National Research Council and Committee on Medical Research, with particular reference to team work on studies of wounds and, 284; in children, 385; chemical, of human cornea, 419; chemical, of rabbit cornea, 420; anemia of thermal, 486; pyruvic acid method in deep clinical, 486; comparative efficacy of blood from normal and from burned donors in experimental, 505

CALCIFICATION, Lesions of musculotendinous cuff of shoulder; pathology, course, and treatment of deposits due to, 272; treatment of peritendinitis calcarea of shoulder joint by roentgen irradiation; 100 cases, 293

Calcium gluconate, Injection of, into muscle, 192

Calculi, Retrograde movement of ureteral, 83; study of experimental urinary, 268; radical surgery for certain cases of pancreatic fibrosis associated with deposits of, 556

Calories, Metabolic alterations following thermal burns; effect of altering intake of nitrogen and, or of administering testosterone propionate on nitrogen balance, 192

Cancer, Surgical relief of pain in, 48; untreated, of breast, 50; artificial menopause and, of breast, 50; use of testosterone propionate in treatment of advanced, of breast, 51; latent bronchial, with initial cerebellar symptoms, 53; surgical treatment of, of rectum and sigmoid, 65; surgical treatment of, of rectum, 65; bone metastases in genital, 73; patient with, of esophagus alive and free from evidence of tumor 6 years after roentgen treatment, 139; resection of duodenum and head of pancreas for, 144; cholangiography in compression or stricture of distal portion of common bile duct, with remarks upon diagnosis and therapy of, of ampulla of Vater, 145; radiotherapy in, of corpus of uterus, 150; of cervix uteri in young women, 150; clinical investigation of complicating fistula rectovaginalis after radium therapy of cervical, 150; of clitoris, 151; results of treatment with radiotherapy in, of prostate, 164; survival following castration for prostatic, 164; value of planigraphy in bronchial, 191; mediastinal tumors and cysts; collective review, 195; multicentric origin of intraoral, 226; diagnosis of bronchogenic, by examination of bronchial secretions, 237; ulcerated, 245; primary, of duodenum, 247; of Meckel's diverticulum 247; of right colon, 248; of cervix, with special reference to young women, 254; uterine choriocarcinoma, 255; prevention and treatment of, of vulva, 255; prostatic, 267; of prostate, 267; chemosurgical treatment of, of nose; microscopically controlled method, 308; more optimistic approach to, of thyroid, 311; intralaryngeal operation for, of vocal cord, 311; bronchiogenic, 319; surgical treatment of, of lung; personal experience, 320; of midthoracic esophagus, 323; diminution in size of niche in, of ventricle; difficulty in differential diagnosis between, and ulcer of ventricle, 329; resection of abdominal, involving liver and spleen secondarily, 334; controversial factors in management of fundal, 342; review of 100 cases of ovarian, 344; of penis, 356; of prostate, 357; tumor dosage and results in roentgen therapy of, of breast, 395; influence of sex hormones upon hepatic lesions produced by 2-acetaminofluorene, 399; significance of industrial, in problem of, 400; results of roentgen therapy in histologically verified cases of pulmonary, 435; surgical treatment of, of esophagus, 437; association of endocervical, with fibromyoma of body of uterus, 450; of bladder, 467; of prostate treated with estrogens, 468; of prostate; résumé of treatment with ethinyl estradiol, 468; of cervix; study of effect of interstitial radon needles as compared with roentgen therapy given through intravaginal cones, 499; effect of progesterone on development of mammary, in C_3H mice, 503; of colon; analysis of 113 cases, 552; conservation of sphincter function in operative treatment of rectal, 554; clinical and statistical notes on, of cervix of uterus, 557; treatment of, of cervix, 558

Capillaries, Probable role of reflex stasis of, in general pathology, 597

Carbohydrate, Metabolism of, during prolonged pentothal anesthesia in dogs; blood sugar and liver glycogen findings, 187

Carcinoid, Relation between appendical, and appendicitis, 442

Cardia, Approach to resection of esophagus and gastric, 143

Cardiospasm, Treatment of, by esophagogastrostomy, 57

Cartilage, Problem of osteochondritis dissecans; cause of constant convexity of base of its niche, and explanation of its frequent occurrence in cretinism, 167

Casein hydrolysate, Reactions to intravenously administered amino acids, 283

Castration, Survival following, for prostatic cancer, 164

Cataract, Surgery of congenital, 526

Cavernoma, Of liver; 2 cases treated by hepatic resection, 66; hepatic, from surgical standpoint; critical review of literature; 71 operated cases, 66

Cecostomy, New technique for temporary, 333

Cecum, Invaginations of haustra of, 63; amebic disease of; clinical and radiological aspects, 550

Cellulose, Oxidized; absorbable hemostatic gauze, cellulosic acid; its use in genitourinary surgery, 270; reaction of tissue to, and fate of oxidized, in peritoneal cavity of dog, 297
Cementoma, Histogenesis of, 422
Cerebrospinal fluid, Cerebral concussion; histochemical demonstration of nucleases in, 229; circulation of, in Carassius gibelio, 430
Cerium oxalate, Question of, as prophylactic against postoperative vomiting, 288
Cervix, Carcinoma of, of uterus in young women, 150; carcinoma of, with special reference to young women, 254; distal ectopic pregnancy; implantation of ovum in mucosa of, 348; cancer of; study of effect of interstitial radon needles as compared with roentgen therapy given through intravaginal cones, 499; treatment of cancer of, 558
Cesarean section, With special emphasis on transverse transperitoneal incision, 461; abdominal, 564
Charcot's joint, Pathogenesis of, 271
Chemistry, Alterations in, of surgical patient and their interpretations, 584
Chemotherapy, Antisepsis and disinfection in surgery; collective review, 107
Children, Seconal as basal anesthetic agent in, 186; anterior transbrachial route in surgical repair of supracondylar fractures of humerus in, 368; burns in, 385; accidents in, 586; premedication in infants and, 590
Choana, Congenital atresia of, 125
Cholangiography, Nonsurgical, in vesicular lithiasis, 68; in compression or stricture of distal portion of common bile duct, with remarks upon diagnosis and therapy of carcinoma of ampulla of Vater, 145
Cholecystitis, With perforation, 250; treatment of, 251; clinical and pathohistological aspect of acute cholecystitis; comparative investigation, 445; etiology of, 554
Cholesterin, Influence of some sexual hormones and of, on productive phenomena in uterus and in mammary glands, 257
Chondroma bulbi, Case of, 123
Chorioepithelioma, Hemoperitoneum resulting from ectopic, 560
Circulation, Treatment of extremities following sudden failure of, 294
Clavicle, Cervical rib; role of, in occlusion of subclavian artery, 93
Cleft palate, Harelip and, 126; pushback operation for repair of, 308
Climacteric, Male, 268
Clitoris, Carcinoma of, 151
Clostridium, Gas gangrene; collective review, 507; account of pathology of some cases of infection due to, 590
Coccidioidomycosis, Roentgenological manifestations of primary pulmonary, 394
Cold, Trench foot and injuries due to, in European theater of operations, 184
Colic, Intravenous urography in acute renal, 263
Colitis, Complications of chronic nonspecific ulcerative, 64; late results in treatment of ulcerative, 332
Collective review, Parathyroid adenoma; study of 322 cases, 1; antisepsis and disinfection in surgery, 107; mediastinal tumors and cysts, 195; course of hypertension after nephrectomy for advanced unilateral renal disease, 299; treatment of injuries of spinal cord, 403; gas gangrene, 507
Colon, Cancer of right, 248; perforating wounds of, and rectum, 248; reconstruction of war wounds of, and rectum, 249; diverticulitis of, 331; megacolon in newborn, 333; megacolon; mechanisms and choice of treatment, 442; management of megacolon (Hirschsprung's disease), 443; dissecting diverticulitis of, 551; carcinoma of; analysis of 113 cases, 552
Common duct, Morphology and variations of duodenal vasculature; relationship to problems of leakage from postgastrectomy duodenal stump, bleeding peptic ulcer, and injury to, 60
Conjunctiva, Keratoconjunctivitis sicca after Stevens-Johnson's disease, 305; cytology of exudates from, 526
Cordotomy, Surgical relief of pain in cancer, 48
Cornea, Influence of local antiseptics on regeneration of epithelium of, of rabbits, 123; preservation of tissue of, for transplantation, 222; keratoconjunctivitis sicca after Stevens-Johnson's disease, 305; indications for keratoplasty, 306; chemical burns of human, 419; chemical burns of rabbit, 420
Coronary vessels, Pericoronary neurectomy in abolishing anginal pain in disease of; experimental evaluation, 54
Cranium, Fibro-osteoma, pathologicoanatomical and roentgenological study, 86; management of war wounds of cavity of, 312; observations concerning hypophysial fossa, 494; optochiasmatic arachnoiditis, 495
Cretinism, Problem of osteochondritis dissecans; cause of constant convexity of base of its niche and explanation of its frequent occurrence in, 167
Crush syndrome, Accidents following prolonged compression of muscles of limbs, 588
Cryptorchidism, Fertility in operatively treated and untreated, 163
Curare, Experience with, in anesthesia, 187; nitrous oxide, cyclopropane and, in anesthesia; review of 200 cases, 188
Cushing's syndrome, 229
Cyclopropane, Nitrous oxide, curare and, in anesthesia; review of 200 cases, 188
Cystectomy, Total, 467
Cystitis, Acute interstitial, 467
Cystocele, Value of operation of Halban in treatment of genital prolapse in presence of large, 341
Cystostomy, Trauma of, by instrument, 466
Cystourethrography, New medium for, 265
Cysts, Nonparasitic, of liver, 66; contribution to casuistics of inflammatory pancreatic, 146; large ovarian, with torsion of pedicle complicated by pregnancy, 156; mediastinal tumors and; collective review, 195; kidney, in field of gynecology, 346; intrathoracic gastric, 439

DARIER fibrosarcoma occurring following bite wound, 296
Deaths, Analysis of maternal, for 12 years in Monroe County, including Rochester, 159; operating room, 592
Decubitus ulcers, Treatment of injuries of spinal cord; collective review, 403; primary closure of, by plastic surgery, 483; primary closure of, 584
Deformities, Surgical treatment of funnel chest, 49; early covering of extensive traumatic, of hand and foot, 182; surgery of spastic, of wrist and hand, 576
Dermis, Transplantation of, in treatment of eventrations, 440
Dextran, Clinical experiences with, used as plasma substitute, 97
Diabetes, Recent advances in care of surgical complications of, (mellitus), 597
Diagnosis, Of bronchogenic carcinoma by examination of bronchial secretions, 237; patent ductus arteriosus with subacute bacterial endarteritis; indications for operation, 238; rupture of urethra; new sign for, 265; diminution in size of niche in cancer of ventricle;

difficulty in differential, between carcinoma and ulcer of ventricle, 329; angiographic, of expanding intracranial lesions by vascular displacement, 390; differential, of intervertebral cartilage ruptures and intraspinal tumors within lumbar sacral canal, 427
Diaphragm, Primary cystic tumor of, 140; hernia diaphragmatica dextra, 242
Diet, Influence of special high protein, on protein regeneration in surgical patient, 177; treatment of injuries of spinal cord; collective review, 403
Diisopropyl fluorophosphate, Use of, (DFP) in treatment of glaucoma, 124; effect of, (DFP) on normal eye, 124
Diphtheria, Tropical ulcers and cutaneous, 398
Dislocations, Treatment of congenital, of hip, 92; management of habitual, of shoulder, 173; congenital, of knee, 274; recurrent, of mandibular joint, 305; and fracture, of spinal column, 313; treatment of chronic congenital, of hip, 365; complete, of acromioclavicular joint; nature of traumatic lesion and effective methods of treatment with analysis of 41 cases, 476; recurrent, of first carpometacarpal joint repaired by functional tenodesis, 477; reduction and arthrodesis of old unilateral congenital, of hips, 576; pathological, of hip following osteoarthritis in infants, 579; ossification of coracoclavicular ligament following, of acromioclavicular articulation, 595
Diverticulitis, Of colon, 331; dissecting, of colon, 551
Diverticulum, Of stomach, 57; of lower thoracic esophagus, 321; pharyngoesophageal; management and complications, 543
Drainage, Principles of improving inadequate tracheobronchial, following trauma to chest, 52; and irrigation of urinary tract, 571
Dropsy, Labyrinthine, 125
Drowning, Transfusion and autotransfusion of oxygenated blood in treatment of asphyxia, electrocution, and carbon monoxide poisoning, 583
Ductless glands, Factors affecting survival in adrenalectomized rats, 400
Ducts, Accidental section of hepatic; ligation of right, and anastomosis of left to common, over a vitallium tube, 67
Ductus arteriosus, Ligation of, 138; patent, and its surgical treatment, 138; patent, with subacute bacterial endarteritis; diagnosis and indications for operation, 238
Duodenum, Study of time of "healing" of peptic ulcer in series of 69 cases of craters in, and stomach, 60; morphology and variations of vasculature of; relationship to problems of leakage from postgastrectomy stump of, to bleeding peptic ulcer and injury to common duct, 60; injuries of, 62; radiographic diagnosis of prolapsed redundant gastric mucosa into, with remarks on clinical significance and treatment, 102; resection of, and head of pancreas for carcinoma, 144; perforated gastroduodenal ulcers, 245; primary cancer of, 247; subtotal gastrectomy for duodenal ulcer of, 328; perforation of ulcer of, during roentgen examination, 593
Dysgerminoma, Ovarian, 71
Dyskinesia, Treatment of postoperative biliary, 445
Dysphagia lusoria, Surgical treatment for, 280
Dystocia, Clinical diagnosis of varying degrees of uterine contraction rings, 75; what should be attitude of obstetrician during so-called "normal" delivery; not including analgesia and anesthesia, 456; anomalies of uterine contraction, 456

EAR, Treatment and training of hard of hearing; program of physical and psychosocial therapy, 44; fenestration of labyrinth, 125; labyrinthine dropsy, 125; atresia of external auditory canal occurring in military service; report on correction of condition in 10 cases, 224; reconstructive otoplasty; further observations; utilization of tantalum wire mesh support, 224; peripheral facial paralysis in acute otitis media, 306; further reports on use of composite free grafts of skin and cartilage from, 421; new treatment for hearing disorders, 527; penicillin therapy in otorhinolaryngologic practice, 527; appraisal of fenestration operation; report of 100 cases, 528
Echinococci, Mediastinal tumors and cysts; collective review, 195
Eclampsia, Intravenous administration of magnesium sulfate as exclusive treatment for, 348; report of case in which there was extensive destruction of brain, 562; rupture of capsule in liver in, 562
Edema, Traumatic pulmonary, treated with concentrated plasma, 433
Elbow, Fractures of, with particular regard to distal end of humerus, 173; displacement of medial epicondyle of humerus into, 273; synovial sarcoma (malignant synovioma) of, 273
Electrocardiography, Fetal, 259
Embolism, Results of 5 years' treatment of thrombosis and pulmonary, at series of Swedish hospitals during years 1940 to 1945, 179; gas, of brain; good effect of intravenous injection of novocain, 382; diagnosis of pulmonary, and its treatment except by method of pulmonary embolectomy, 585; surgical treatment of pulmonary, 585
Embolus, Large, of pulmonary artery, 233; prognosis and treatment of large, of pulmonary artery, 382; surgically removed foreign body, in pulmonary artery, 435
Embryo, Changes in lens of, after rubella; microscopic examination of 8 weeks old, 123
Embryoma of kidney in adult, 81
Emotion, Nausea and vomiting of pregnancy; study in psychosomatic and social medicine, 259
Emphysema, War injuries of chest, 133
Encephalography, Use of laminography with, in diagnosis of midline and subtentorial brain tumors, 100
Endarteritis obliterans, Intra-arterial injections in treatment of, 176
Endometriosis, In association with pregnancy, 349; conservative surgery in, 451
Endometrium, Blood vessels of human, 149
Enteritis, Acute regional, 142
Enterococci in urinary tract infections, 269
Enterogastrone, Effectiveness of parenterally administered, in prophylaxis of recurrences of experimental and clinical peptic ulcer, 549
Eosinophilia in malignant tumors; its significance, 505
Epididymitis, Nonspecific acute, 166
Epilepsy, Symptomatic abdominal, 449
Epiphyseolisthesis, Incipient, of hip; its diagnosis and treatment, 168
Epistaxis, Surgical treatment of severe epistaxis in relation to ethmoidal arteries, 315
Erysipeloid; survey of 115 cases, 185
Erythroblastosis, Demonstration of Rh antibodies in newborn and further evidence of pathogenesis of, 377; fetal, 461
Erythrocytes, Blood transfusion studies; survival of fresh and stored transfused, as determined by urobilinogen excretion, 481
Esophagitis, Contribution to roentgen diagnosis of limited, 138
Esophagogastrostomy, Treatment of cardiospasm by, 57; treatment of patients with achalasia by, 57
Esophagoscope, Treatment of esophageal varices by injections of sclerosing agents through, 240

Esophagus, Patient with cancer of, alive and free from evidence of tumor 6 years after roentgen treatment, 139; approach to resection of, and gastric cardia, 143; pathogenic varieties of dilatation of, 240; peptic ulcer of, 240; perforation of, not caused by instrumentation; review of 8 cases, 240; surgical treatment for dysphagia lusoria, 280; congenital atresia of, with tracheoesophageal fistula, 320; diverticula of lower thoracic, 321; carcinoma of midthoracic, 323; peptic ulcer of; report of patient with 10 year follow-up, 435; surgical treatment of carcinoma of, 437; diagnosis and treatment of obstruction of, and trachea due to congenital vascular ring, 539; congenital atresia of, and tracheoesophageal fistula, 541; intrathoracic esophagojejunostomy for lesions of upper third of, 542; diverticulum of pharynx and; management and complications, 543
Estrogens, Carcinoma of prostate treated with, 468
Estrone, Quantitative analysis of urinary, in course of pregnancy, 454
Ethinyl estradiol, Carcinoma of prostate; résumé of treatment with, 468
Eventrations, Transplantation of dermis in treatment of, 440
Exercises, Use of routine bed, following major surgery, 177
Exophthalmos and tissue changes in guinea pig following administration of thyroid stimulating hormone of pituitary gland, 532
Eye, Observations on Vossius ring, 42; scleral resection (eyeball shortening) operation, 42; retinal detachment due to war trauma, 44; technical uses of air in ophthalmology, 122; studies on dark adaptation in military personnel complaining of "night blindness," 122; management of intraocular foreign bodies in military practice, 122; changes in lens of embryo after rubella; microscopic examination of 8 weeks old embryo, 123; influence of local antiseptics on regeneration of corneal epithelium of rabbits, 123; results of radiotherapy of epibulbar tumors at Radiumhemmet, Stockholm, 1920–1940, 123; case of chondroma bulbi, 123; use of diisopropyl fluorophosphate (DEP) in treatment of glaucoma, 124; effect of diisopropyl fluorophosphate (DEP) on normal, 124; alkali burns of; clinical and pathologic course, 222; mustard gas burns of human, 222; preservation of corneal tissue for transplantation, 222; pterygium, its nature and new line of treatment, 222; visual disturbances associated with head injuries, 223; congenital encephalo-ophthalmic dysplasia, 223; keratoconjunctivitis sicca after Stevens-Johnson's disease, 305; indications for keratoplasty, 306; vascular basis of allergy of, and its adnexa, 418; certain operations on superior oblique, 419; chemical burns of human cornea, 419; chemical burns of rabbit cornea, 420; detachment of retina; pathological and therapeutic considerations, 420; intraocular tumors in soldiers, 421; pure penicillin in ophthalmology, 421; autonomic nervous system in diseases of, 421; physiological factors in differential diagnosis of paralysis of superior rectus and superior oblique muscles, 525; survey of results of lacrimal stricturotomy, 525; intraocular foreign body; 72 cases in B.L.A., 525; Lewisite lesions of rabbits', 526; cytology of conjunctival exudates, 526; surgery of congenital cataract, 526; posterior ring abscess of metastatic origin in Behcet's disease, 527

FACE, Peripheral paralysis in acute otitis media, 306; use of masseter, temporalis, and frontalis muscles in correction of paralysis of, 308; asymmetry of, and malocclusion from hyperplasia of mandible; correction by operation, 529; original method of correction of hyperplastic asymmetry of mandible, 529; ankylosis of coronoid process of mandible and associated scar limitation of jaw function, 529; peripheral paralysis of; some aspects of its pathology, 534; nerve surgery in European theater of operations, 534
Facial nerve, Neurinoma of, 230
Fallopian tubes, Torsion of, 71
Feet, Early covering of extensive traumatic deformities of hands and, 182; repair of avulsion wounds of hands and, by flap graft technique, 381; arthrodesis of subtalus and midtarsal joints of, 474; hallux valgus and hallux rigidus, 478
Femur, Incipient epiphyseolisthesis of hip; diagnosis and treatment, 168; fractures of neck of, 277; late complications of fractures of neck of, treated surgically, 277; intra-articular fractures in upper end of tibia and lower end of, 278; late results of thrombophlebitis of, and their treatment, 279; subtrochanteric osteotomy for ununited fracture of neck of, 368; secondary osteosynthesis in operative elongation of, 577
Fenestration, Appraisal of operation for; report of 100 cases, 528
Fetus, Electrocardiography of, 259; risk to, in breech delivery, 260; mortality of, in breech delivery, 260; survival of, in premature separation of normal insertion of placenta, 455; erythroblastosis of, 461; significance of microcystic ovary in, 558
Fever, Intrapartum, 158
Fibrinogen, Use of coagulum due to, in pyelolithotomy, 353
Fibrinolysis, Observations on; plasminogen, plasmin, and antiplasmin content of human blood, 501
Fibroma, Of stomach, 58; necrosis of, and polyps of uterus, 70; mediastinal tumors and cysts; collective review, 195
Fibromyoma, Statistical data obtained from Perugia Obstetrical and Gynecological Clinic, on uterine, and fibromatosis from January 1, 1936 to December 31, 1944, 254
Fibromyositis including its industrial implications, with special reference to referred pain, 502
Fibromyxoxanthoma, Mediastinal, 543
Fibro-osteoma, Pathologicoanatomical and roentgenological study, 86
Fibrosarcoma of Darier occurring after bite wound, 296
Fibula, Para-articular ossification of soft parts of ankle; complication of sprain with or without fracture of shaft of ipsilateral, 364
Fingers, Results of arthroplasty of joints of, 474
First aid, Treatment of injuries of spinal cord; collective review, 403
Fistulas, Arteriovenous, and arterial aneurysms in military personnel, 94; clinical investigation of complication, (rectovaginal) after radium therapy of cervical carcinoma, 150; treatment of functional traumatic bladder incontinence and vesicovaginal, at Allmänna BB, 153; repair of defects and, in urinary bladder, 162; repair of hypospadias and urethral, 162; congenital esophageal atresia with tracheoesophageal, 320; gastrocolic; clinical and experimental study, 440; operative procedure for repair of urethrodiverticulovaginal, 451; arterial repair in treatment of aneurysms and arteriovenous, 479; congenital atresia of esophagus and tracheoesophageal, 541
Foam, Clinical and experimental observations on use of gelatin sponge or, 288
Food, Delayed healing of abdominal wound due to allergy to, 184
Forceps, Demelin 8; 10 years' experience in Pedro A. Pardo maternity, 349
Forearm, Study of supination and pronation, with especial reference to treatment of fractures of, 578

Foreign body, In and in relation to the thoracic blood vessels and heart; migratory, within blood vascular system, 54; management of intraocular, in military practice, 122; surgically removed embolus due to, in pulmonary artery, 435; intraocular; 72 cases in B.L.A., 525
Fractures, Of inferior maxilla and indications for new surgical method of treating; osteosynthesis with Kirschner wire, 91; of upper end of radius, 172; of elbow, with particular regard to distal end of humerus, 173; multiple, in long bones of infants suffering from chronic subdural hematoma, 276; articular and nerve complications following epitrochlear, 276; of carpal scaphoid bone; analysis of 66 cases, 277; of neck of femur, 277; late complications of, of neck of femur treated surgically, 277; intra-articular, in upper end of tibia and lower end of femur, 278; dislocation and dislocation with, of spinal column, 313; orthopedic surgery in European theater of operations, 372; subtrochanteric osteotomy for ununited, of neck of femur, 368; anterior transbrachial route in surgical repair of supracondylar, of humerus in children, 368; of mandible, 417; of malar zygomatic compound; treatment by improved methods and myoplasty, 417; operation for nonunion of, of carpal navicular, 477; study of supination and pronation with especial reference to treatment of forearm, 578; end-results of bone grafting for nonunion of carpal navicular, 579; stable osteosynthesis; personal experience with Kuentscher's method, 579; accidents in childhood, 586
Friedmann's reaction, Biologic reaction in 2 cases of tumor of testicle, 85
Frontal bone, Eosinophile granuloma of, 305
Frostbite sustained in war, 384
Funnel chest, Surgical treatment of, 49
Furunculosis, Mechanism of infection in chronic recurrent staphylococcal diseases; special clinical bacteriological investigation of, and its complications, 589

GALL bladder, Nonsurgical cholangiography in lithiasis of, 68; cholecystitis with perforation, 250; treatment of cholecystitis, 251; clinical and pathohistological aspect of acute cholecystitis; comparative investigation, 445; etiology of cholecystitis, 554; clinical study of normal and pathologic motor activity of; preliminary report, 594
Gangrene, Two additional cases of, of limbs of venous origin, 279
Gas, Embolism of brain due to; good effect of intravenous injection of novocain, 382
Gas gangrene, Collective review, 507
Gastrectomy, Subtotal, for duodenal ulcer, 328
Gastritis, Chronic; its course and significance, 245
Gastrointestinal tract, Nutritional abdominal allergy from surgical standpoint, 56; treatment of cardiospasm by esophagogastrostomy, 57; treatment of patients with achalasia by esophagogastrostomy, 57; suppurative perisigmoiditis, 64; bleeding in, in hereditary hemorrhagic telangiectasia; historical review and case report with gastroscopic findings and rutin therapy, 142; approach to resection of esophagus and gastric cardia, 143; resection of stomach, 143; study of peptic ulcer, 144; aftermath of perforated peptic ulcer, 144; histological diagnosis of appendicitis, 144; mediastinal tumors and cysts; collective review, 195; antireticular cytotoxic serum of Bogomoltz in treatment of diseases of, 244; problems in etiology of peptic ulcer; resistance of, to digestive action of its own secretions, 246; prolapse of rectum, 248; new technique for temporary cecostomy, 333; normal appendices in 1,000 appendectomies, 334; gastrocolic fistula; clinical and experimental study, 440; relation between appendical carcinoid and appendicitis, 442; symposium on bleeding of; diagnostic and therapeutic considerations, 547; roentgenological examination in patients with bleeding from, 547; analysis of peptic ulcer in South Australia, based on study of 1,027 reports, 548; conservative treatment of acute perforated peptic ulcer, 548; effectiveness of parenterally administered "enterogastrone" in prophylaxis of recurrences of experimental and clinical peptic ulcer, 549; surgical aspects of hemorrhage from peptic ulcer, 549; appendicitis; review of 936 cases at Cincinnati General Hospital, 551; acute appendicitis in aged, 551
Gauze, Absorbable, in bone surgery, 89; report of clinical trial of oxidized, in 7 thoracoplasties, 319
Gelatin, Clinical and experimental observations on use of sponge or foam of, 288; sponge for control of hemorrhage, 493; studies on use of sponge or foam of, as hemostatic agent in experimental liver resections and injuries to large veins, 505
Gelatinous disease of peritoneum, 328
Genital organs (female), Torsion of fallopian tube, 71; sudoriparous adenoma of, 72; associated neoplasms of genitomammary spheres, 72; results of salpingostomy at Public Maternity Hospital, Stockholm, 1931–1942, 151; surgery for female sterility, 152; umbilical metastases from tumors of, 155; treatment of vaginal discharge, 256; results in treatment of gynecologic and obstetric conditions with Bogomoltz' antireticular cytotoxic serum (ACS), 256; Halban's operation; anatomical study of vesicovaginal fascia, 341; study of pathological associations between internal, and appendix, 345; intraperitoneal hemorrhages of genital origin, not including ectopic pregnancy, 345; clinicostatistical study of 56 cases of hydatidiform mole, 346; gonocytoma, 347; operative procedure for repair of urethrodiverticulovaginal fistula, 451; conservative surgery in endometriosis, 451; arrhenoblastoma-androblastoma, 452; surgical treatment of prolapse of uterus, 557; surgical treatment of myomas of uterus, with particular reference to myomectomy, 557; neoplasms of broad ligament; critical review of literature with report of 3 cases, 559; hemoperitoneum from ectopic chorioepithelioma, 560; relation of tumors of small bowel to, 561
Genital organs (male), Value of urethrography in tuberculosis of, 84; benign prostatic obstruction, 85; biologic reaction in 2 cases of tumor of testicle; Friedmann's reaction, 85; fertility in operatively treated and untreated cryptorchidism, 163; nonspecific acute epididymitis, 166; male infertility, 268; male climacteric, 268; gonocytoma, 347; arrhenoblastoma-androblastoma, 452; mumps orchitis, 469
Genitourinary surgery, Oxidized cellulose (absorbable hemostatic gauze; cellulosic acid); its use in, 270
Genitourinary tract, Unnecessary abdominal operations for pathological lesions of, 340; injuries to, in European theater of operation, 359
Gland, Bilateral mixed tumors of submaxillary, 42
Glaucoma, Use of diisopropyl fluorophosphate (DFP) in treatment of, 124
Glycogen, Observations on carbohydrate metabolism during prolonged pentothal anesthesia in dogs; blood sugar and liver, 187
Goiter, Exophthalmic, in males, 127; mediastinal tumors and cysts; collective review, 195; lymphadenoid; its differentiation from chronic thyroiditis, 228; studies on 2 sporadic cretinous brothers with; remarks on relation of hyperplasia to neoplasia, 423; malignant, 532

Gonococci, Peritonitis due to, of upper part of abdomen in young women (phrenic reaction or subcostal syndrome of Stajano; Fitzhugh-Curtis syndrome); report of cases of 3 patients treated successfully with penicillin and summary of literature, 154
Gonocytoma, 347
Grafting, Surgical principles of split thickness skin, 484; end-results of bone, for nonunion of carpal navicular, 579
Grafts, Of skin for burned dorsum of hand, 283; study of fate of nerve homografts in man, 314; repair of war wounds of bulbous and membranous urethra with split thickness skin, and penicillin, 354; tenon and mortise, for bridging metacarpal defects due to gunshot wounds, 365; repair of avulsion wounds of hands and feet by flap technique, 381; further reports on use of composite free, of skin and cartilage from ear, 421; pseudarthroses with bone loss treated with flexible bone, and intramedullary wire, 474; free transplants of skin; bandage skin, 483; source of nerve, in clinical surgery; technique for surgery, 536; indications for determination of thickness for split skin, 586
Granuloma, Eosinophile, of frontal bone, 305; osseous manifestations of eosinophile; report of 9 cases, 472; eosinophile, of bone, 574
Graves' disease, What has thiouracil taught us about pathologic physiology of, 531
Grégoire's blue phlebitis, Pseudoembolic phlebitis, 374
Gynecology, Kidney cysts in field of, 346; importance of lysozym in, and obstetrics, 453; present status of transfusion of whole blood and its derivatives in obstetrics and, 455; phlebothrombosis and thrombophlebitis in, and obstetrics, 559
Gynecomastia, Mastectomy for, through semicircular intra-areolar incision, 317

HALBAN'S operation, Value of, in treatment of genital prolapse in presence of large cystocele, 341; anatomic study of vesicovaginal fascia, 341
Hallux rigidus, Hallux valgus and, 478
Halogens, Antisepsis and disinfection in surgery; collective review, 107
Hands, Bone surgery of, 89; early covering of extensive traumatic deformities of, and foot, 182; skin grafting burned dorsum of, 283; tenon and mortise grafts for bridging metacarpal defects due to gunshot wounds, 365; repair of avulsion wounds of, and feet by flap graft technique, 381; rehabilitation of injured, 386; surgery of spastic deformity of wrist and, 576
Harelip, And cleft palate, 126; orbicularis oris muscle in double, 308
Head, Visual disturbances associated with injuries of, 223; eosinophile granuloma of frontal bone, 305; temporomandibular joint, 305; recurrent dislocation of mandibular joint, 305; rationale of treatment in maxillofacial injuries, 421; observations concerning hypophysial fossa, 494; treatment of extensive losses of scalp, 524
Headaches after spinal anesthesia and technique for lessening their frequency, 491
Healing, Study of time of, of peptic ulcer in series of 69 cases of duodenal and gastric craters, 60; effects of adult animal tissue extracts on, of wounds, 504
Hearing, Treatment and training of hard of; program of physical and psychosocial therapy, 44; new treatment for disorders of, 527
Heart, Foreign bodies in, and relation to, thoracic blood vessels and; migratory foreign bodies within blood vascular system, 54; war injuries of chest, 133; fetal electrocardiography, 259; 2 unusual cases of war wounds of, 237; resuscitation by massage of, 485; size of, in routine chest films, 496; determination of frontal plane area from product of long and short diameters of cardiac silhouette, 496
Heat, Antisepsis and disinfection in surgery; collective review, 107
Hemangioma, Mediastinal tumors and cysts; collective review, 195; treatment of cutaneous, with radium, 498
Hematoma, Multiple fractures in long bones of infants suffering from chronic subdural, 276; experimental study of subdural, 312; experiences with operative treatment of aneurysm and of pulsating, from 1941 to 1946, 479
Hemoperitoneum, Rare case of, 254; from ectopic chorioepithelioma, 560
Hemophilia, Pseudohemophilia, 376; pseudohemophilia; case study, 377
Hemorrhage, Problem of surgical arrest of massive, in peptic ulcer, 59; prevention of complications in biliary surgery by vitamin K, 146; surgical treatment of severe epistaxis in relation to ethmoidal arteries, 315; surgical treatment of bleeding peptic ulcer, 329; intraperitoneal, of genital origin, not including ectopic pregnancy, 345; history of, in peptic ulcer, 441; nongravidic ovarian, 451; retroperitoneal, complicating pregnancy, 454; ovarian, caused by nidation of fertilized ovum at level of ovary, 454; gelatin sponge for control of, 493; 2 cases of allergylike reaction with diathesis for, following roentgen treatment, 497; ascorbic acid, riboflavin, thiamin, and nicotinic acid in relation to severe injury, and infection in human, 502; symposium on gastrointestinal bleeding; diagnostic and therapeutic considerations of gastrointestinal bleeding, 547; roentgenological examination in patients with bleeding from gastrointestinal tract, 547; effectiveness in parenterally administered "enterogastrone" in prophylaxis of recurrences of experimental and clinical peptic ulcer, 549; surgical aspects of, from peptic ulcer, 549
Hemostasis, Clinical and experimental observations on use of gelatin sponge or foam, 288; reaction of tissue to, and fate of, oxidized cellulose in peritoneal cavity of dog, 297; after adenoid operations, 422; gelatin sponge for control of hemorrhage, 493; studies on use of gelatin sponge or foam as agent for, in experimental liver resections and injuries to large veins, 505
Hemothorax, Walled off by fibrinous deposit; impenetrable, 132; massive organizing, 241
Heparin, Subcutaneous, in anticoagulation therapy, 97; in venous thrombosis, 98
Hernia, Important dividing wall between caudal, and prolapse of abdominal or pelvic viscera, 72; why, recurs, 243; Spiegel's, 243; inguinal; unpredictable result, 440; pacchionic granulations and brain, 533
Hernia diaphragmatic dextra, 242
Hip, Experiences with Brittain ischiofemoral arthrodesis, 91; treatment of congenital dislocation of, 92; incipient epiphyseolisthesis of; its diagnosis and treatment, 168; route of internal access to, 276; treatment of chronic congenital dislocation of, 365; reduction and arthrodesis of old unilateral congenital dislocations of, 576; pathological luxations of, following osteoarthritis in infants, 579
Hirschsprung's disease, Management of megacolon, 443
Histamine, Irradiation sickness; effect of, treated with benadryl, 190
Hodgkin's disease, Mediastinal tumors and cysts; collective review, 195
Hormones, Influence of some sexual, and of cholesterin on productive phenomena in uterus and in mammary glands, 257; influence of sex, upon hepatic lesions produced by 2-acetaminofluorene, 399; quantitative anal-

ysis of urinary estrone in course of pregnancy, 454; circulating thyroid, in blood and lymph, 530; exophthalmos and tissue changes in guinea pig following administration of thyroid stimulating, of pituitary gland, 532
Hospitals, Rehabilitation of surgical patient in Army, in World War II, 191
Humerus, Fractures of elbow, with particular regard to distal end of, 173; displacement of medial epicondyle of, into elbow joint, 273; articular and nerve complications following epitrochlear fracture, 276; anterior transbrachial route in surgical repair of supracondylar fractures of, in children, 368; screwing ruptured tendon of long portion of brachial biceps into diaphysis of, 576
Hydatidiform mole, Clinicostatistical study of 56 cases of, 346
Hydronephrosis, Surgical treatment of, 160
Hydroxycoumarin, Anticoagulant effect of, in vivo; its value and use in surgery, 383
Hymen, Urological complications following operation for imperforate, 255
Hypertension, Paroxysmal, caused by tumor of suprarenal medulla, 80; surgical approach to, 130; course of, after nephrectomy for advanced unilateral renal disease; collective review, 299; production of experimental portal, in dog; anatomy of hepatic veins in dog, 401
Hyperthyroidism, Paraxanthine treatment of, 45; treatment of, with methylthiouracil, 227; treatment of, with propylthiouracil, 530
Hypophysectomy, Quantitative effects of, on testis and prostate of dogs, 194
Hypospadias, Repair of, and urethral fistula, 162; treatment of, 355
Hypothyroidism, Effect of thiouracil, on reproduction in rat, 193
Hysterectomy, Total abdominal; study of 500 cases, 149; report of 2,798 cases of vaginal, 450; study of 500 cases of vaginal, 450

ICTERUS, Congenital malformations of extrahepatic biliary tract with subhepatic obstructive, 251; postpenicillin, 400
Ileus, Improved intravenous treatment of intestinal occlusion; experimental study, 597
Incisions, Fundamentals of technique in transverse abdominal, 141
Industry, Significance of cancer in, in problem of cancer, 400
Infections, Clinical study of leishmaniasis Americana of skin; leishmania Brasiliensis-Vianna, 1911, 105; antisepsis and disinfection in surgery; collective review, 107; puerperal, and sensitiveness to streptococcal toxins, 159; anthrax; diagnosis and treatment, 181; cutaneous anthrax, 181; prevention of wound, by injection of nontoxic antibacterial substances, 183; new lingual-oral method of administration of penicillin, 184; erysipeloid; survey of 115 cases, 185; intrathecal streptomycin in meningitis; clinical trial in tuberculous, coliform, and other, 230; surgical complications of amebiasis, 252; enterococci in urinary tract, 269; acute secondary parotitis, 284; leishmaniasis of skin and mucosa, 296; use of streptomycin in experimental peritonitis, 297; pulmonary actinomycosis, 317; female urethra and its relation to upper urinary tract, 359; postoperative wound; evaluation of factors concerned with resistance of tissues to, 388; penicillin in treatment of established surgical, 487; streptomycin, 488; streptomycin in, 488; analysis of experience with streptomycin therapy in United States Army hospitals, 489; ascorbic acid, riboflavin, thiamin, and nicotinic acid in relation to severe injury, hemorrhage and, in human, 502; therapeutic trial of penicillin in tetanus, 504; gas gangrene; collective review, 507; penicillin therapy in otorhinolaryngologic practice, 527; notes on treatment of tetanus, 588; ineffectiveness of local surgical treatment in manifest tetanus, 589; mechanism of, in chronic recurrent staphylococcal diseases; special clinical bacteriological investigation of furunculosis and its complications, 589; account of pathology of some cases of clostridium welchii, 590
Infertility, Male, 268
Innervation, Effect of, on mineral composition of bone; new experimental research, 368
Insulin, Test with, for presence of intact nerve fibers after vagal operations for peptic ulcer, 549
Interinnominoabdominal operation, Further review of, based on 21 personal cases, 485
Intervertebral disc, Persistent sciatica due to hernia of; 14 further observations, 231; myelography in patients with ruptured cervical, 292; pathological, and its consequences; contribution to cause and treatment of chronic pain low in back and to subject of herniating, 313; differential diagnosis of rupture of, and intraspinal tumors within lumbar sacral canal, 427; posterior dislocation of lumbosacral, 535
Intestines, Effect of penicillin in experimental obstruction of, 58; acute regional enteritis, 142; necrosis and ulceration of wall of, in simple obstruction of, 246; Whipple's lipodystrophy of, 330; definitive surgery of large, following war wounds, 330; ulcus simplex jejuni, 550; relation of tumors of small bowel to genital organs in female, 561; improved intravenous treatment of occlusion of; experimental study, 597
Invagination of haustra of cecum, 63
Irrigation, Treatment of acute renal failure by peritoneal, 351
Isotopes, Radioactive, 596

JAWS, Fractures of inferior maxilla and indications for new surgical method of treating fractures; osteosynthesis with Kirschner wire, 91; temporomandibular joint, 305; recurrent dislocation of mandibular joint, 305; fracture of mandible, 417; fractures of malar zygomatic compound; treatment by improved methods and myoplasty, 417; rationale of treatment in maxillofacial injuries, 421; odontomas and other affections of; their pathology, diagnosis, and treatment, 524; facial asymmetry and malocclusion from hyperplasia of mandible; correction by operation, 529; original method of correction of hyperplastic asymmetry of mandible, 529; ankylosis of coronoid process of mandible and associated scar limitation of function of, 529
Jejunum, Surgical treatment of ulcer of, 62
Joints, Limitation of movement of scapulohumeral, by muscle anomaly, 86; bilateral habitual luxation in posterior part of shoulder, 90; experiences with Brittain ischiofemoral arthrodesis, 91; study of diffusion of penicillin across serous membranes of cavities of, 103; air arthrography as aid to diagnosis of lesions of menisci of knee, 190; pathogenesis of Charcot's, 271; lesions of musculotendinous cuff of shoulder; observations on pathology, course, and treatment of calcific deposits, 272; route of internal access to hip, 276; articular and nerve complications following epitrochlear fracture, 276; study in articular replacement, 278; radiohumeral synovitis, 363; treatment of chronic congenital dislocation of hip, 365; orthopedic surgery in European theater of operations, 372; costotransverse tuberculous osteoarthritis, 471; results of arthroplasty

of finger, 474; arthrodesis of subtalus and midtarsal, of foot, 474; pseudarthroses with bone loss treated with flexible bone grafts and intramedullary wire, 474; complete dislocations of acromioclavicular; nature of traumatic lesion and effective methods of treatment with analysis of 41 cases, 476; recurrent dislocation of first carpometacarpal, repaired by functional tenodesis, 477; reduction and arthrodesis of old unilateral congenital dislocations of hips, 576; surgical mobilization of rigid, with interposition of absorbable membranes, 577; pathological luxations of hip following osteoarthritis in infants, 579; ossification of coracoclavicular ligament following dislocation of acromioclavicular articulation, 595; roentgen treatment of bursitis of shoulder, 595

KERATOPLASTY, Indications for, 306
Kidney, Parathyroid adenoma; study of 322 cases; collective review, 1; possibility of nephelometric examination of proteinuria in prophylaxis of nephrogestosis, 74; statistical report on 73 patients with unilateral tuberculosis of, treated by nephrectomy, 80; embryoma of, in adult, 81; aneurysm of renal artery following partial nephrectomy, 82; massive perirenal lipoma with report of case, 83; danger of intravenous injection of protein solutions after sudden loss of tissue of, 106; value of early pyelography and functional tests in contusions of, 160; hydronephrosis; surgical treatment, 160; intravenous urography in acute colic of, 263; Wilms' tumor, 263; unique case of submucosal epithelial nests in ureter and pelvis of, 264; course of hypertension after nephrectomy for advanced unilateral renal disease; collective review, 299; cysts of, in field of gynecology, 346; treatment of acute failure of, by peritoneal irrigation, 351; tuberculosis of, in 6 year old girl, 352; new method of suturing pelvis of, in pyelotomies, 352; use of fibrinogen coagulum in pyelolithotomy, 353; 4 cases of tuberculosis of, 463; renal surgery, 465; perinephritis and perirenal abscess, 463; indications for nephropexy, 465; arteriography in diagnosis, 566; complications of sulfonamide therapy in, 567
Kirschner wire, Fractures of inferior maxilla and indications for new surgical method of treating fractures; osteosynthesis with, 91
Knee, Polycystic xanthoma of meniscus, 169; air arthrography as aid to diagnosis of lesions of menisci of, 190; congenital luxation of, 274
Kuentscher's method, Stable osteosynthesis; personal experience with, 579

LABOR, Clinical diagnosis of varying degrees of uterine contraction rings, 75; study of mechanism of delivery in brow presentation, 76; studies on elderly primiparas, 78; analysis of 500 obstetrical cases managed under continuous caudal anesthesia with pontocaine, 157; aspiration of stomach contents into lungs during obstetric anesthesia, 158; intrapartum fever; preliminary study, 158; fetal risk in breech delivery, 260; fetal mortality in breech delivery, 260; obstetrical paralysis of upper limb, 261; intravenous procaine for obstetrical anesthesia, 287; Demelin forceps 8; 10 years of experience in Pedro A. Pardo maternity, 349; management of so-called "normal" delivery by obstetrician, 455; what should be attitude of obstetrician during so-called "normal" delivery—not including analgesia and anesthesia, 456; anomalies of uterine contraction, 456; treatment of prolonged, with extract from posterior lobe of pituitary gland, 460; internal version in Angel Custodio Sanhueza Maternity Hospital, 460; cesarean section with special emphasis on transverse transperitoneal incision, 461; abdominal cesarean section, 564; fourth stage of, 564
Labyrinth, Fenestration of, 125; dropsy of, 125
Lacrimal duct, Survey of results of stricturotomy of, 525
Laminagraphy, Use of, with encephalography in diagnosis of midline and subtentorial brain tumors, 100
Laminectomy, Treatment of injuries of spinal cord; collective review, 403
Larynx, Roentgenography and tomography of, 100; tuberculosis of, 228; intralaryngeal operation for cancer of vocal cord, 311; reinnervation of paralyzed vocal cord, 400; sarcoma of; report of 8 cases, 532
Legs, Plasmocytoma of both, 274; case of Albright's syndrome (osteitis fibrosa disseminata), 361
Leishmaniasis, Clinical study of, (Americana) of skin—(Brasiliensis-Vianna 1911), 105; of skin and mucosa, 296
Lens, Changes in, of embryo after rubella; microscopic examination of 8 weeks old embryo, 123
Leucemia, Roentgen therapy for, 191
Leucotomy, Bilateral frontal lobe, 533
Lewisite lesions of rabbits' eyes, 526
Lingulectomy, Technique for segmental pulmonary resection with particular reference to, 237
Lip, Mixed tumors of, 226
Lipiodol, Pulmonary reaction following intrabronchial instillation of, in bronchial asthma, 593
Lipodystrophy, Whipple's intestinal, 330
Lipoma, Massive perirenal; with report of case, 83; mediastinal tumors and cysts; collective review, 195
Lithiasis, Nonsurgical cholangiography in vesicular, 68; effect of renoureteral, on upper urinary tract, 80; vaginal ureterolithotomy, 81; management of common duct stone missed at operation, 252; genuine prostatic, 266
Liver, Nonparasitic cysts of, 66; cavernomas of; 2 cases treated by hepatic resection, 66; cavernoma of, from surgical standpoint; critical review of literature; 71 operated cases, 66; accidental section of ducts of; ligation of right duct and anastomosis of left to common duct over vitallium tube, 67; partial hepatectomy in certain primary tumors of, 250; resection of abdominal carcinomas involving, and spleen secondarily, 334; clinical contribution to study of relationship between biliary stasis and lesions of, 334; influence of sex hormones upon lesions of, produced by 2-acetaminofluorene, 399; postpenicillin jaundice, 400; production of experimental portal hypertension in dog; anatomy of veins of, in dog, 401; studies on use of gelatin sponge or foam as hemostatic agent in experimental resection of liver and injuries to large veins, 505; rupture of capsule in eclamptic, 562
Looser-Milkman syndrome, Radio transparent stria of bone and, 497
Lungs, Chest wounds in battle casualties, 51; principles of improving inadequate tracheobronchial drainage following trauma to chest, 52; combined intrapleural and extrapleural pneumothorax (pneumothorax mixte), 52; latent bronchial carcinoma with initial cerebellar symptoms, 53; pleural complications in course of suppuration of, 137; differential diagnosis and treatment of tuberculomas in, 137; aspiration of stomach contents into, during obstetric anesthesia, 158; value of planigraphy in bronchial cancer, 191; mediastinal tumors and cysts; collective review, 195; pulmonary artery; its ramifications and relations, 233; large emboli of pulmonary artery, 233; Thresher's, 234; solitary primary neurogenic tumors of, 234; Boeck's sarcoid; brief review and report of case in which diagnosis was

made by bronchoscopic examination and biopsy, 236; diagnosis of bronchogenic carcinoma by examination of bronchial secretions, 237; mucocellular papillary adenocarcinoma of, and lobectomy, 237; technique for segmental pulmonary resection, with particular reference to lingulectomy, 237; pulmonary actinomycosis, 317; stenosis of large bronchi in course of chronic tertiary pulmonary tuberculosis in adult, 317; open pneumonolysis, 318; report of clinical trial of oxidized gauze in 7 thoracoplasties, 319; bronchiogenic carcinoma, 319; surgical treatment of cancer of; personal experience, 320; segmental pulmonary resection; its indications, 320; roentgenological manifestations of primary coccidioidomycosis of, 394; traumatic pulmonary edema treated with concentrated plasma, 433; studies in abscess of, 433; adenomatosis of, 434; result of roentgen therapy in histologically verified cases of cancer of, 435; anesthesia in surgical treatment of congenital pulmonic stenosis, 491; lobectomy and pneumonectomy in treatment of tuberculosis of, 537; surgical treatment of large tubercular cavities of superior lobe, 538; bronchial adenoma, 538; surgical treatment of congenital stenosis of, 538; pulmonary reaction following intrabronchial instillation of lipiodol in bronchial asthma, 593

Luxation, Case of bilateral habitual, in posterior part of shoulder joint, 90

Lymphadenitis, Some observations on nonspecific abdominal, 253

Lymphadenosis, Infectious, (mononucleosis) and thrombocytopenic purpura; recovery after splenectomy; report of case, 147

Lymphangioma, Mediastinal tumors and cysts; collective review, 195

Lymph glands, Primary tumors of, of vascular origin—lymphangiothelioma of abdominal, 482

Lymphoepithelioma, 380

Lymphogranuloma, Malignant, of stomach, 550

Lymphogranulomatosis, Clinical forms of Nicolas-Fabre's disease, 267

Lymph system, Mediastinal tumors and cysts; collective review, 195; association of Brazilian blastomycosis and tuberculosis in glandular lesions, 282; lymphoepithelioma, 380

Lysozym, Antisepsis and disinfection in surgery; collective review, 107; importance of, in gynecology and obstetrics, 453

MAGNESIUM sulfate, Intravenous administration of, as exclusive treatment for eclampsia, 348

Male, Infertility in, 268; climacteric in, 268

Malignancy, Testicular neoplasms, 165; eosinophilia in; its significance, 505; goiter, 532

Mammary glands, Influence of some sexual hormones and of cholesterin on productive phenomena in uterus and in, 257

Manchester operation with reference to parturition and complete prolapse; report of 206 cases, 255

Mandible, Fracture of, 417; facial asymmetry and malocclusion from hyperplasia of, (correction by operation), 529; original method of correction of hyperplastic asymmetry of, 529; ankylosis of coronoid process of, and associated scar limitation of jaw function, 529

Massage, Resuscitation by cardiac, 485

Mastectomy for gynecomastia through a semicircular intraareolar incision, 317

Maxilla, Fractures of inferior, and indications for new surgical method of treating fractures; osteosynthesis with Kirschner wire, 91; osteomyelitis of, secondary to suppurative maxillary sinusitis, 226

Meckel's diverticulum, Carcinoma of, 247

Mediastinum, Tumors and cysts of; collective review, 195; fibromyxoxanthoma of, 543

Medical education, Graphic approach to complete anatomy, 298

Megacolon, In newborn, 333; mechanisms and choice of treatment, 442; management of, (Hirschsprung's disease), 443

Melanocytoblastoma, Primary, of central nervous system, 312

Meninges, Invasion of paranasal sinuses by tumors originating in, 231

Meningitis, Intrathecal streptomycin in; clinical trial in tuberculous, coliform, and other infections, 230

Meniscus, Polycystic xanthoma of, 169

Menopause, Artificial; and cancer of breast, 50

Mesentery, Acute thrombosis of superior artery of; recovery following extensive resection of small and large intestines, 147

Metabolism, Discussion on water, in pregnancy, 156; observations on carbohydrate, during prolonged pentothal anesthesia in dogs; blood sugar and liver glycogen, 187; alterations in, following thermal burns; effect of altering nitrogen and caloric intake of or administering testosterone propionate on nitrogen balance, 192; ascorbic acid, after trauma, 597

Metal salts, Antisepsis and disinfection in surgery; collective review, 107

Metastases, Bone, in genital carcinoma, 73; umbilical, from tumors of female genitalia, 155

Methylthiouracil, Treatment of hyperthyroidism with, 227

Metrorrhagia, Postclimacteric, and malignant tumors of ovary, 558

Migraine and sympathetic pathways, 129

Mineral, Effect of innervation on composition of bone; new experimental research, 368

Mononucleosis, Infectious lymphadenosis and thrombocytopenic purpura; recovery after splenectomy; report of case, 147; rupture of spleen in infectious, 147

Mouth, Multicentric origin of intraoral carcinoma, 226; orbicularis oris muscle in double harelip, 308; pushback operation for repair of cleft palate, 308; management of injuries to Stensen's duct, 309; histogenesis of cementoma, 422; odontogenic tumors, 530

Mucosa, Leishmaniasis of skin and, 296

Mumps orchitis, 469

Muscles, Limitation of movement of scapulohumeral joint by anomaly of, 86; transplantation of, for paralysis of radial nerve, 172; calcium gluconate injection into, 192; use of masseter, temporalis, and frontalis, in correction of facial paralysis, 308; sympathetic control of blood vessels of human skeletal, 398; certain operations on superior oblique, 419; multiple innervation of limb, in man, 477; fibromyositis, including its industrial implications and with special reference to referred pain, 502; physiological factors in differential diagnosis of paralysis of superior rectus and oblique, 525; accidents following prolonged compression of, of limbs, 588

Mustard gas burns of human eyes, 222

Myasthenia gravis, Symposium on surgical treatment of, 295; surgical treatment of, 505

Myelography, Opaque, in penetrating wounds of spinal cord, 290; in patients with ruptured cervical intervertebral discs, 292; pantopaque; diagnostic errors and review of cases, 292

Myoblastoma, Granular cell, of mammary gland, 131

Myoma, Mediastinal tumors and cysts; collective review, 195; surgical treatment of, of uterus, with particular reference to myomectomy, 557

Myopia, Scleral resection (eyeball shortening) operation, 42

NASOPHARYNX, Stenosis of, and correction, 224; odontoma of, 227
Neck, Histogenetic study of adenolymphomas, 104; exposure of blood vessels, 581; injuries of cervical vertebrae, 535
Nephrectomy, Course of hypertension after, for advanced unilateral renal disease; collective review, 299
Nephrogestosis, On possibility of nephelometric examination of proteinuria in prophylaxis of, 74
Nerve, Study of fate of homografts of, in man, 314; surgery of facial, in European theater of operations, 534; source of autografts of, in clinical surgery; technique, 536
Nerves, Painful injuries of, and their surgical treatment, 46; course and rate of regeneration of motor fibers following lesions of radial, 47; blocking of splanchnic, and first lumbar sympathetic ganglion, 48; innervation of uterus, 70; experimental study of pathogenesis of general syndrome of burns, 99; mediastinal tumors and cysts; collective review, 195; neurinoma of facial, 230; Boeck's sarcoid; brief review and report of case in which diagnosis was made by bronchoscopic examination and biopsy, 236; complications of joints and, following epitrochlear fracture, 276; repair of traumatic loss of substance of trunks of, of limbs; physiopathological study, 315; peripheral injuries to spinal accessory, 427; treatment of loss of substance in, 428; treatment of loss of substance of peripheral, 428; results of surgical treatment in wounds of peripheral, with loss of substance, 429; neurectomy to produce atrophy of amputation stump, 476; multiple innervation of limb muscles in man, 477; peripheral facial paralysis; some aspects of its pathology, 534; insulin test for presence of intact fibers of, after vagal operations for peptic ulcer, 549
Nervous system, Neurological complications of spinal anesthesia, 389
Neurectomy, Pericoronary, in abolishing anginal pain in coronary disease; experimental evaluation, 54
Neurinoma, Medullary compression by, in course of Recklinghausen's disease, 46; of facial nerve, 230; roentgen study of intrathoracic, 496
Neuritis, Tardy median palsy; median; median thenar, amenable to surgery, 314
Newborn, Megacolon in, 333; demonstration of Rh antibodies in, and further evidence of pathogenesis of erythroblastosis, 377; relationship of maternal weight gain to weight of, 461; antepartum prediction of hemolytic disease of, 565
Nicolas-Fabre's disease, Clinical forms of, 267
Nicotinic acid, Ascorbic acid, riboflavin, thiamin, and, in relation to severe injury, hemorrhage, and infection in human, 502
Night blindness, Studies on dark adaptation in military personnel complaining of, 122
Nitrogen, Metabolic alterations following thermal burns; effects of altering intake of, and calories or of administering testosterone propionate on balance of, 192; level of plasma alpha amino, in patients with thermal burns, 284
Nitrous oxide, Cyclopropane, and curare anesthesia; review of 200 cases, 188; and oxygen anesthesia, 590
Nose, Congenital choanal atresia, 125; plastic repair of deflected septum of, 307; repair of losses of, 308; chemosurgical treatment of cancer of; microscopically controlled method, 308
Novocain, Gas embolism of brain; good effect of intravenous injection of, 382
Nucleus pulposus, Phantom, 100
Nutrition, Abdominal allergy due to, from surgical standpoint, 56

OBSTETRICS, Importance of lysozym in gynecology and, 453; present status of transfusion of whole blood and its derivatives in, and gynecology, 455; phlebothrombosis and thrombophlebitis in gynecology and, 559
Odontoma of nasopharynx, 227
Odontomes and other affections of jaws; their pathology, diagnosis, and treatment, 524
Operation, Absorbable gauze in bone surgery, 89; segmental pulmonary resection; its indications, 320; study of trauma due to, as factor in production of shock, 501; blood loss in; statistical comparison of losses as determined by gravimetric and colorimetric methods, 584; chemical alterations occurring in surgical patient, and their interpretations, 584; deaths, 592; recent advances in care of surgical complications of diabetes mellitus, 597
Orthopedic surgery in European theater of operations, 372
Osteitis deformans, Sarcomatous change in cases of Paget's, 272
Osteitis fibrosa disseminata, Case of Albright's syndrome, 361
Osteochondritis, Circumscribed, of astragalus, 364
Osteochondritis dissecans, Problem of; cause of constant convexity of base of its niche and explanation of its frequent occurrence in cretinism, 167
Osteochondroma, Mediastinal tumors and cysts; collective review, 195
Osteomalacia, Anatomoclinical study of pelvis in, 77
Osteomyelitis, Of maxilla secondary to suppurative maxillary sinusitis, 226; Penicillin treatment of experimental, in rabbits, 271; remarks on 53 cases of acute, treated with penicillin, 271; pyogenic, of spine, 574
Osteosynthesis, Secondary, in operative elongation of femur, 577; stable, personal experience with Kuentscher's method, 579
Ovaries, Dysgerminoma of, 71; large cysts of, with torsion of pedicle complicated by pregnancy, 156; anatomical, histological, and clinical observations of tumors of, 343; review of 100 cases of cancer of, 344; nongravidic hemorrhages of, 451; hemorrhages of, caused by nidation of fertilized ovum at level of, 454; significance of microcystic, in fetus, 558; postclimacteric metrorrhagia and malignant tumors of, 558; connective tissue tumors of, 558
Oxidation, Antisepsis and disinfection in surgery; collective review, 107

PAGET'S disease, Sarcomatous change in, (osteitis deformans), 272; statistical study of 82 cases, 471; localization of, in a single vertebra, 574
Pain, Surgical relief of, in cancer, 48; pericoronary neurectomy in abolishing anginal, in coronary disease; experimental evaluation, 54; indications and results of surgery of autonomic nervous system in naval personnel, 231; pathological intervertebral disc and its consequences; contribution to cause and treatment of chronic, low in back and to subject of herniating intervertebral disc, 313; treatment of injuries of spinal cord; collective review, 403; experiences with cortical excisions for relief of intractable, in extremities, 426; fibromyositis, including its industrial implications and with special reference to referred, 502
Palate, Harelip and cleft, 126; push-back operation for repair of cleft, 308
Palsy, Tardy median; median neuritis; median thenar neuritis amenable to surgery, 314; x-ray appearances of pharyngeal, 394
Pancoast tumor, Mediastinal tumors and cysts; collective review, 195

Pancreas, Resection of duodenum and head of, for carcinoma, 144; contribution to casuistics of inflammatory cysts of, 146; some observations on roentgenography of, 190; islet-cell tumor of, with hyperinsulinism, 336; radical surgery for certain cases of fibrosis of, associated with calcareous deposits, 556
Pancreatitis, As cause of complete obstruction of common duct, 448; surgery in acute, 555
Paralysis, Muscle transplantation for, of radial nerve, 172; effect of pentothal sodium on mean arterial blood pressure in presence of high spinal cord, 186; obstetrical, of upper limb, 261; peripheral facial, in acute otitis media, 306; use of masseter, temporalis, and frontalis muscles in correction of facial, 308; tendon transplantation for radial, 314; reinnervation of paralyzed vocal cord, 400; physiological factors in differential diagnosis of, of superior rectus and superior oblique muscles, 525; peripheral facial; some aspects of its pathology, 534; contribution to pathogenesis of Volkmann's ischemic, 573
Paraplegia, Discussion on spinal caries with, 371; treatment of injuries of spinal cord; collective review, 403; new viewpoint toward spinal cord injuries, 534
Parathyroid glands, Adenoma of; study of 322 cases; collective review, 1; mediastinal tumors and cysts; collective review, 195; remarks concerning 39 interventions on thymus and, 296
Paraxanthine treatment of hyperthyroidism, 45
Parotitis, Acute secondary, 284
Parturition, Manchester operation, with reference to, and complete prolapse; report of 206 cases, 255
Pelvis, Important dividing wall between caudal herniation and prolapse of viscera of abdomen or, 72; anatomo-clinical study of osteomalacic, 77
Penicillin, Effect of, in experimental intestinal obstruction, 58; study of diffusion of, across serous membranes of joint cavities, 103; antisepsis and disinfection in surgery; collective review, 107; gonococcic peritonitis of upper part of abdomen in young women (phrenic reaction, or subcostal syndrome of Stajano; Fitz-Hugh-Curtis syndrome); report of cases of 3 patients treated successfully with, and summary of literature, 154; new lingual-oral method of administration of, 184; treatment of experimental osteomyelitis in rabbits, 271; remarks on 53 cases of acute osteomyelitis treated with, 271; in wound exudates, 285; staphylococci in wounds resistant to; report based on study of 59 cases of infected war wounds, 286; repair of war wounds of bulbous and membranous urethra with split thickness skin grafts and, 354; jaundice after use of, 400; pure, in ophthalmology, 421; in treatment of established surgical infections, 487; therapeutic trial of, in tetanus, 504; gas gangrene; collective review, 507; therapy in otorhinolaryngologic practice with, 527; intrathecal use of, 535
Penis, Loss of coverage of, scrotum, and urethra, 182; treatment of hypospadias, 355; carcinoma of, 356; tuberculosis of, 568
Pentothal, Observations on carbohydrate metabolism during prolonged anesthesia with, in dogs; blood sugar and liver glycogen, 187; stages and signs of anesthesia with; physiological basis, 287; effect of, alone and in combination with oxygen or nitrous oxide-oxygen on arterial blood gases, 489
Pentothal sodium, Effect of, on mean arterial blood pressure in presence of high spinal cord paralysis, 186
Pericardium, Mediastinal tumors and cysts; collective review, 195
Peripheral nerves, Painful injuries of nerves and their surgical treatment, 46; course and rate of regeneration of motor fibers following lesions of radial, 47; tardy median palsy; median neuritis; median thenar neuritis amenable to surgery, 314; tendon transplantation for radial paralysis, 314; repair of traumatic loss of substance of nerve trunks of limbs; physiopathological study, 315; treatment of loss of substance in, 428; treatment of loss of substance of, 428; results of surgical treatment in wounds of, with loss of substance, 429; source of nerve autografts in clinical surgery; technique for surgery, 536
Peritoneum, Suppurative perisigmoiditis, 64; gelatinous disease of, cholecystoduodenocolic membranes, 335; study on treatment of acute renal failure by irrigation, 351
Peritonitis, Experimental appendical; prognostic significance of certain hematological factors, especially prothrombin time, 63; gonococcal, of upper part of abdomen in young women (phrenic reaction, or subcostal syndrome of Stajano; Fitz-Hugh-Curtis syndrome); report of cases of 3 patients treated successfully with penicillin, and summary of literature, 154; intraperitoneal administration of succinylsulfathiazole and phthalylsulfathiazole; their use in prophylaxis and treatment of, 244; use of streptomycin in experimental, 297
Personality, Pretraumatic, and psychiatric sequelae of head injury; correlation of multiple, specific factors in pretraumatic, and psychiatric reactions to head injury, based on analysis of 101 cases, 128
Perthes' test, Multiple, for segmental occlusion of deep veins, 93
Pharynx, Schwannoma of, 126; stenosis of nasopharynx and correction, 224; x-ray appearances of palsy of, 394; hemostasis after adenoid operations, 422; diverticulum of, and esophagus; management and complications, 543
Phenobarbital, Treatment of radiation sickness with trasentine, and trasentine and; preliminary report, 397
Phenols, Antisepsis and disinfection in surgery; collective review, 107
Pheochromocytoma, Clinical picture and treatment of, of suprarenal, 263
Phlebitis, Pseudoembolic, (Grégoire's blue), 374
Phosphorus, Investigation on permeability of placenta with aid of red blood corpuscles tagged with radioactive, 349
Phthalylsulfathiazole, Intraperitoneal administration of succinylsulfathiazole and; their use in prophylaxis and treatment of peritonitis, 244
Pilonidal cysts and sinuses; technique for excision and primary closure, 104
Pilonidal sinuses and cysts; technique for excision and primary closure, 104
Pituitary gland, Treatment of prolonged labor with extract from posterior lobe of, 460
Placenta, Investigation of permeability of, with help of elliptocytes, 349; investigations on permeability of, with aid of red blood corpuscles tagged with radioactive phosphorus, 349; fetal survival in premature separation of normal insertion of, 455
Placenta previa, Discussion on, 156
Planigraphy, Value of, in bronchial cancer, 191
Plasma, Clinical experiences with dextran as substitute for, 97; preservation of normal human, in liquid state; clinical, chemical, and physicochemical studies during 3 years of storage at room temperature, 379; traumatic pulmonary edema treated with concentrated, 433; use of animal, or serum in man; universal detoxified, or serum, 598
Plasminogen, Observations on fibrinolysis; content of plasmin, antiplasmin, and, in human blood, 501

Plasmocytoma of both legs, 274
Plastics, Uses of, in surgery, 402
Plastic surgery, Two-stage mastopexy in, of markedly enlarged breasts, 131; reconstruction of thumb, 169; on thumb, 171; present evaluation of merits of Z-plastic operation, 178; skin dressings in treatment of débrided wounds, 181; loss of coverage of penis, scrotum, and urethra, 182; early covering of extensive traumatic deformities of hand and foot, 182; reconstructive otoplasty; further observations; utilization of tantalum wire mesh support, 224; plastic repair of deflected nasal septum, 307; repair of nasal losses, 308; further reports on use of composite free grafts of skin and cartilage from ear, 421; operative correction of hypertrophy and ptosis of female breast; 300 cases, 431; primary closure of bed sores by, 483; free transplants of skin; bandage skin graft, 483; surgical principles of split thickness skin grafting, 484; indications for determination of thickness for split skin grafts, 586
Platelet count and function, 281
Pleura, Complications in, in course of suppuration of lungs, 137
Pneumatic tools, Disease resulting from use of, 103; changes in bones of wrist in workers with, 472
Pneumonolysis, Open, 318
Pneumothorax, Combined intrapleural and extrapleural, (pneumothorax mixte), 52; war injuries of chest, 133
Polyps, Necrosis of fibromas and, of uterus, 70
Pontocaine, Analysis of 500 obstetrical cases managed under continuous caudal anesthesia with, 157
Porencephalia, 494
Postmaturity, Problem of, 157
Pregnancy, On possibility of nephelometric examination of proteinuria in prophylaxis of nephrogestosis, 74; studies on peripheral blood picture during, and so-called anemias of, 74; discussion on water metabolism in, 156; large ovarian cysts with torsion of pedicle complicated by, 156; discussion on placenta previa, 156; problem of "postmaturity," 157; analysis of maternal deaths for 12 years in Monroe county including Rochester, 159; interstitial, 259; nausea and vomiting of; study in psychosomatic and social medicine, 259; presentations in twin deliveries, 260; adrenal function in, 296; intraperitoneal hemorrhages of genital origin, not including ectopic, 345, distal ectopic; implantation of ovum in cervical mucosa, 348; intravenous administration of magnesium sulfate as exclusive treatment for eclampsia, 348; investigations of permeability of placenta with help of elliptocytes, 349; investigations on permeability of placenta with aid of red blood corpuscles tagged with radioactive phosphorus, 349; endometriosis in association with, 349; quantitative analysis of urinary estrone in course of, 454; retroperitoneal hemorrhage complicating, 454; ovarian hemorrhages caused by nidation of fertilized ovum at level of ovary, 454; fetal survival in premature separation of normal insertion of placenta, 455; anatomic peculiarities of human umbilical cord and their clinical significance, 462; eclampsia; report of case in which there was extensive destruction of brain, 562; rupture of capsule in eclamptic liver, 562; etiology of spontaneous abortion—excepting syphilis, 563; antepartum prediction of hemolytic disease of newborn, 565
Presentation, In twin deliveries, 260; fetal risk in breech delivery, 260; fetal mortality in breech delivery, 260
Primiparas, Studies on elderly, 78
Procaine, Intravenous, for obstetrical anesthesia, 287
Progesterone, Effect of, on development of mammary cancer in C_3H mice, 503
Propylthiouracil, Treatment of hyperthyroidism with, 530
Prostate gland, Benign obstruction of, 85; results of treatment with radiotherapy in carcinoma of, 164; survival following castration for cancer of, 164; quantitative effects of hypophysectomy on testis and, of dogs, 194; genuine liathiasis of, 266; carcinoma of, 267; carcinoma of, 267; cancer of, 357; carcinoma of, treated with estrogens, 468; carcinoma of, résumé of treatment with ethinyl estradiol, 468
Protein, Danger of intravenous injection of solutions of, after sudden loss of renal tissue, 106; influence of special high diet of, on regeneration of, in surgical patient, 177
Pseudohemophilia, 376; case study, 377
Psychosis, Observations on changes in states of mental depression and tension following surgical section of certain frontal lobe pathways, 426
Pterygium; its nature and new line of treatment, 222
Puerperium, Infections of, and sensitiveness to streptococcal toxins, 159; relationship of maternal weight gain to weight of newborn infant, 461; fourth stage of labor, 564
Purpura, Infectious lymphadenosis (mononucleosis) and thrombocytopenic; recovery after splenectomy, 147
Pyelography, Value of early, and functional tests in contusions of kidneys, 160
Pyelolithotomy, Use of fibrinogen coagulum in, 353
Pyelotomy, New method of suturing renal pelvis in, 352
Pyometra, On methods of treatment in presence of, 149
Pyridoxine hydrochloride (vitamin B_6) in control of radiation sickness; preliminary report, 397
Pyruvic acid method in deep clinical burns, 486
Pyuria, Abacterial, presenting as "urethritis," 266

QUECKENSTEDT test, Treatment of injuries of spinal cord; collective review, 403

RADIONECROSIS, Histopathogenetic considerations of, 498
Radium, Results of therapy with, of epibulbar tumors at Radiumhemmet, Stockholm, 1920-1940, 123; further experience with radiotherapy in cancer of corpus of uterus, 150; clinical investigation of complicating fistula rectovaginalis after therapy with, of cervical carcinoma, 150; treatment of cutaneous hemangioma with, 498; dose measurement in beta-ray therapy, 499
Radius, Fractures of upper end of, 172
Radon, Cancer of cervix; study of effect of interstitial needles of, as compared with roentgen therapy given through intravaginal cones, 499
Recklinghausen's disease, Medullary compression by neurinomas in course of, 46
Rectum, Surgical treatment of cancer of, and sigmoid, 65; surgical treatment of cancer of, 65; prolapse of, 248; perforating wounds of colon and, 248; reconstruction of war wounds of colon and, 249; conservation of sphincter function in operative treatment of carcinoma of, 554
Rehabilitation, Of surgical patient in Army hospitals in World War II, 191; of injured hand, 386; treatment of injuries of spinal cord; collective review, 403
Resuscitation, By cardiac massage, 485; and anesthesia, 490
Reticuloendotheliosis with report of 2 cases, 282
Retina, Detachment of, due to war trauma, 44; detachment of; pathological and therapeutic considerations, 420
Rh antibodies, Demonstration of, in newborn and further evidence of pathogenesis of erythroblastosis, 377
Riboflavin, Ascorbic acid, thiamin, and nicotinic acid in relation to severe injury, hemorrhage, and infection in human, 502

Ribs, Cervical; role of clavicle in occlusion of subclavian artery, 93; clinical picture and therapy of tuberculosis of, 131
Roentgenography, Early pneumoencephalographic findings following penetrating wounds of brain, 46; fibro-osteoma; pathologicoanatomic study with, 86; primary malignant bone tumors, 87; and tomography of larynx, 100; of prolapsed redundant gastric mucosa into duodenum, with remarks on clinical significance and treatment, 102; contribution to, of limited esophagitis, 138; value of early pyelography and functional tests in contusions of kidneys, 160; some observations on, of pancreas, 190; intravenous urography in acute renal colic, 263; new medium for cystourethrography, 265; multiple fractures in long bones of infants suffering from chronic subdural hematoma, 276; round shadows in maxillary sinuses, 225; new sign in extrahepatic biliary tract disease, 290; opaque myelography in penetrating wounds of spinal cord, 290; myelography in patients with ruptured cervical intervertebral discs, 292; pantopaque myelography; diagnostic errors and review of cases, 292; infantile cortical hyperostoses, 362; circumscribed osteochondritis of astragalus, 364; angiographic diagnosis of expanding intracranial lesions by vascular displacement, 390; appearances of pharyngeal palsy, 394; manifestations of primary pulmonary coccidioidomycosis, 394; retrograde abdominal aortography; contribution to study of abdominal aorta and iliac arteries, 396; of spondylolisthesis with special reference to stability determination, 396; treatment of injuries of spinal cord; collective review, 403; experiences in ventriculography of tumors below tentorium, 424; pathogenesis of ulcer, 441; some observations concerning hypophysial fossa, 494; porencephalia, 494; optochiasmatic arachnoiditis, 495; heart size from routine chest films, 496; determination of frontal plane area from product of long and short diameters of cardiac silhouette, 496; study of intrathoracic neurinoma, 496; radiotransparent stria of bone and Looser-Milkman syndrome, 497; congenital atresia of esophagus and tracheoesophageal fistula, 541; examination in patients with bleeding from gastrointestinal tract, 547; arteriography in renal diagnosis, 566; belt for compression of ureters, 568; eosinophile granuloma of bone, 574; perforation of duodenal ulcer during roentgen examination, 593; diagnosis of diseases of neck of bladder, 594
Roentgen rays, Histopathogenetic considerations of radionecrosis, 498
Roentgen sickness, Pyridoxine hydrochloride (vitamin B_6) in control of; preliminary report, 397; treatment of, with trasentine and trasentine-phenobarbital, 397
Roentgen therapy, Untreated carcinoma of breast, 50; patient with cancer of esophagus, alive and free from evidence of tumor 6 years after, 139; results of treatment with, in carcinoma of prostate, 164; combined, and surgical treatment of large benign giant cell tumors of bone, 172; irradiation sickness; histamine effect treated with benadryl, 190; for leucemia, 191; reticuloendotheliosis; with report of 2 cases, 282; treatment of peritendinitis calcarea of shoulder joint by; report of 100 cases, 293; tumor dosage and results in, of cancer of breast, 395; result of, in histologically verified cases of pulmonary cancer, 435; 2 cases of allergylike reaction with hemorrhagic diathesis following, 497; cancer of cervix; study of effect of interstitial radon needles as compared with roentgen therapy given through intravaginal cones, 499; of bursitis of shoulder, 595
Rubella, Changes in lens of embryo after; microscopic examination of 8 weeks old embryo, 123
Rutin, Gastrointestinal bleeding in hereditary hemorrhagic telangiectasia; historical review and case report with gastroscopic findings and results of therapy with, 142

SALINE solution, Improved intravenous treatment of intestinal occlusion; experimental study, 597
Salivary glands, Pathology and clinical symptoms of tumors on, 42; bilateral mixed tumors of submaxillary, 42
Salpingostomy, Results of, at Public Maternity Hospital, Stockholm, 1931-1942, 151
Sarcoma, Of spleen, 147; collective review, 195; change in Paget's osteitis deformans, 272; synovial (malignant synovioma), of elbow, 273; mediastinal tumors and cysts; primary Hodgkin's, of brain, 230; of larynx; report of 8 cases, 532; 5 cases of, involving female breast, 537
Scalp, Cirsoid aneurysm of, 95; treatment of extensive losses of, 524
Scaphoid bone, Fractures of carpal; analysis of 66 cases, 277
Schwannoma of pharynx, 126
Sciatica, Persistent, due to hernia of intervertebral disc; 14 further observations, 231
Scrotum, Loss of coverage of penis, urethra and, 182
Seconal as basal anesthetic agent in children, 186
Sedimentation rate, Rationale of blood, 294
Seminoma, Two cases of, in inverted testicle, 357
Septum, Plastic repair of deflected nasal, 307
Serum, Use of animal plasma or, in man; universal detoxified plasma or, 598
Shock, Intracardiac transfusion, 96; postoperative blood changes with regard to, 178; treatment of injuries of spinal cord; collective review, 403; study of operative trauma as factor in production of, 501
Shoulder, Limitation of movement of scapulohumeral joint by muscle anomaly, 86; case of bilateral habitual luxation in posterior part of, 90; management of habitual dislocation of, 173; acroparesthesia, 192; lesions of musculotendinous cuff of; observations on pathology, course, and treatment of calcific deposits, 272; study in articular replacement, 278; treatment of peritendinitis calcarea of, by roentgen irradiation; report of 100 cases, 293; complete dislocations of acromioclavicular joint; nature of traumatic lesion and effective methods of treatment with analysis of 41 cases, 476; ossification of coracoclavicular ligament following dislocation of acromioclavicular articulation, 595; roentgen treatment of bursitis of, 595
Sigmoid, Surgical treatment of cancer of rectum and, 65
Sinuses, Adamantinoma of maxillary, with report of 2 cases, 45; round shadows in maxillary, 225; invasion of paranasal, by tumors of meningeal origin, 231
Sinusitis, Osteomyelitis of maxilla secondary to suppurative maxillary, 226
Skeleton, Parathyroid adenoma; study of 322 cases; collective review, 1
Skin, Dressings of, in treatment of débrided wounds, 181; erysipeloid; survey of 115 cases, 185; leishmaniasis of, and mucosa, 296; tropical ulcers and cutaneous diphtheria, 398; free transplants of; bandage grafts of, 483; surgical principles of split thickness grafting of, 484; treatment of cutaneous hemangioma with radium, 498; induction of neoplasia in vitro with virus; experiments with rabbit, grown in tissue culture and treated with Shope papilloma virus, 503
Spasm, Treatment of injuries of spinal cord; collective review, 403
Sphincter, Conservation of function of, in operative treatment of rectal carcinoma, 554
Spiegel's hernia. Remarks concerning, 243

Spinal anesthesia, Neurological complications of, 389; headache after, and technique for lessening their frequency, 491
Spinal block, Differential, 189
Spinal cord, Medullary compression by neurinomas in course of Recklinghausen's disease, 46; effect of pentothal sodium on mean arterial blood pressure in presence of paralysis high in, 186; persistent sciatica due to hernia of intervertebral disc; 14 further observations, 231; opaque myelography in penetrating wounds of, 290; myelography in patients with ruptured cervical intervertebral discs, 292; pantopaque myelography; diagnostic errors and review of cases, 292; pathological intervertebral disc and its consequences; contribution to cause and treatment of chronic pain low in back and to subject of herniating intervertebral disc, 313; treatment of injuries of; collective review, 403; differential diagnosis of intervertebral cartilage ruptures and intraspinal tumors within lumbar sacral canal, 427; new viewpoint toward injuries of, 534; injuries of cervical vertebrae, 535; management of cord bladder by transurethral resection, 568
Spine, Phantom nucleus pulposus, 100; interarticular isthmus hiatus (spondylolysis), 169; mediastinal tumors and cysts; collective review, 195; dislocation and fracture dislocation of, 313; discussion on caries of, with paraplegia, 371; roentgenographic study of spondylolisthesis with special reference to stability determination, 396; peripheral injuries to accessory nerve of, 427; circulation of cerebrospinal fluid in Carassius gibelio, 430; posterior dislocation of lumbosacral intervertebral disc, 535; intrathecal use of penicillin, 535; spondylolisthesis, 574; pyogenic osteomyelitis of, 574; localization of Paget's disease in a single vertebra, 574
Splanchnicectomies, Late results of 63, done for various diseases (except chronic arterial hypertension), 315
Spleen, Rupture of, in infectious mononucleosis, 147; sarcoma of, 147; resection of abdominal carcinomas involving liver and, secondarily, 334
Splenectomy, Infectious lymphadenosis (mononucleosis) and thrombocytopenic purpura; recovery after; report of case, 147
Spondylolisthesis, 574; roentgenographic study of, with special reference to stability determination, 396
Spondylolysis, Interarticular isthmus hiatus, 169
Sponge, Clinical and experimental observations on use of gelatin, or foam, 288
Sprain, Para-articular ossification of soft parts of ankle; complication of with or without fracture of shaft of ipsilateral fibula, 364
Staphylococci, Penicillin-resistant, in wounds; report based on study of 59 cases of infected war wounds, 286; concerning the mechanism of infection in chronic recurrent diseases due to; special clinical bacteriological investigation of furunculosis and its complications, 589
Stensen's duct, Management of injuries to, 309
Sterility, Surgery for female, 152; appendicitis and, 559
Stevens-Johnson's disease, Keratoconjunctivitis sicca after, 305
Stomach, Diverticula of, 57; fibromas of, 58; thread employed as suture material in, as possible cause of postoperative complications, 58; study of time of "healing" of peptic ulcer in series of 69 cases of craters in duodenum and, 60; radiographic diagnosis of prolapsed redundant mucosa of, into duodenum, with remarks on clinical significance and treatment, 102; resection of, 143; aspiration of contents of, into lungs during obstetric anesthesia, 158; chronic gastritis; observations on its course and significance, 245; perforated gastroduodenal ulcers, 245; concerning the diminution in size of niche in cancer of ventricle; difficulty in differential diagnosis between carcinoma and ulcer of ventricle, 329; intrathoracic cyst of, 439; malignant lymphogranuloma of, 550
Streptococci, Puerperal infections and sensitiveness to toxins of, 159; sulfonamide sensitivity determinations of hemolytic, isolated from patients before and after treatment with sulfadiazine, 503
Streptomycin, 488; antisepsis and disinfection in surgery; collective review, 107; prevention of wound infection by injection of nontoxic antibacterial substances, 183; studies on; assay in body fluids, 192; studies on; blood levels and urinary excretion in man and animals, 192; intrathecal, in meningitis; clinical trial in tuberculous, coliform, and other infections, 230; use of, in experimental peritonitis, 297; in infections, 488; analysis of experience with therapy with, in United States Army Hospitals, 489
Streptothricin, antisepsis and disinfection in surgery; collective review, 107
Struma lymphomatosa, Clinicopathological study, 126
Succinylsulfathiazole, Intraperitoneal administration of, and phthalylsulfathiazole; their use in prophylaxis and treatment of peritonitis, 244
Sudeck's atrophy, 477
Sulfadiazine, Sulfonamide sensitivity determinations of hemolytic streptococci isolated from patients before and after treatment with, 503
Sulfamylon, Prevention of wound infection by injection of nontoxic antibacterial substances, 183
Sulfonamides, Antisepsis and disinfection in surgery; collective review, 107; sensitivity determinations of hemolytic streptococci isolated from patients before and after treatment with sulfadiazine, 503; gas gangrene; collective review, 507; renal complications of therapy with, 567
Surgery, Surgical lessons of last 5 years of war and their application to postwar surgical practice, 383; uses of plastics in, 402
Suture, Thread employed as material for, in stomach as possible cause of postoperative complications, 58
Sympathetic nerves, Blocking of splanchnic, and first lumbar sympathetic ganglion, 48; migraine and, 129; use of tetraethylammonium in peripheral vascular disease and causalgic states, 129; surgical approach to hypertension, 130; indications and results of surgery of, in naval personnel, 231; surgical treatment of severe epistaxis in relation to ethmoidal arteries, 315; late results of 63 splanchnicectomies done for various diseases (except chronic arterial hypertension), 315; control of blood vessels of human skeletal muscle, 398; autonomic nervous system in eye diseases, 421
Synovioma, Synovial sarcoma (malignant,) of elbow, 273
Synovitis, Radiohumeral, 363
Syringobulbia, Surgical treatment of, and syringopontia; report of 2 cases, 425

TACTILE end organs, Tumor of, 193
Tantalum, Reconstructive otoplasty; further observations; utilization of wire mesh support of, 224
Telangiectasia, Gastrointestinal bleeding in hereditary hemorrhagic; historical review and case report with gastroscopic findings and suggested use of rutin therapy, 142
Tendons, Conservation of short amputation stumps by section of, 91; transplantation of, for radial paralysis, 314; screwing the ruptured, of long portion of brachial biceps into diaphysis of humerus, 576
Teratomas, Mediastinal tumors and cysts; collective review, 195

Testicle, Biological reaction in 2 cases of tumor of; Friedmann's reaction, 85; fertility in operatively treated and untreated cryptorchism, 163; malignant neoplasms of, 165; quantitative effects of hypophysectomy on, and prostate of dogs, 194; 2 cases of seminoma in inverted, 357; mumps orchitis, 469; actinomycosis of, 469; tumors of; report of 922 cases, 469

Testosterone propionate, Use of, in treatment of advanced carcinoma of breast, 51; metabolic alterations following thermal burns; effect of altering nitrogen and caloric intake or of administering, on nitrogen balance, 192

Tetanus, Therapeutic trial of penicillin in, 504; notes on treatment of, 588; ineffectiveness of local surgical treatment in manifest, 589

Tetraethylammonium, Use of, in peripheral vascular disease and causalgic states, 129

Thiamin, Ascorbic acid, riboflavin, and nicotinic acid in relation to severe injury, hemorrhage, and infection in human, 502

Thiouracil, Effect of hypothyroidism due to, on reproduction in rat, 193; sternal marrow studies in thyrotoxicosis treated with, and review of literature regarding effects of, on blood, 310; complications following administration of, 423; what has, taught us about pathologic physiology of Graves' disease, 531; treatment of toxic thyroid disease with, 531

2-Thiouracil, Estimation of, in plasma and urine following its administration in thyrotoxicosis, 531

Thoracoplasty, Report of clinical trial of oxidized gauze in 7 cases of, 319

Thorax, Surgical treatment of funnel chest, 49; chest wounds of, in battle casualties, 51; principles of improving inadequate tracheobronchial drainage following trauma to, 52; combined intrapleural and extrapleural pneumothorax (pneumothorax mixte),52; technical considerations in surgical therapy for coarctation of aorta, 54; hemothorax walled off by fibrinous deposit; impenetrable hemothorax, 132; war injuries of chest, 133; thoracoabdominal casualty, 135; management of wounds of, and of, and abdomen in forward areas in Sicilian and Italian campaigns, 136; pathogenic varieties of dilatation of esophagus, 240; perforation of esophagus not caused by instrumentation; review of 8 cases, 240; massive organizing hemothorax, 241; crushing injuries of chest, 324; initial surgery of thoracoabdominal war injuries, 325; causes of, and indications for re-operation following gunshot wounds of, 326; intrathoracic gastric cyst, 430; heart size from routine chest films, 496; roentgen study of intrathoracic neurinoma, 496; diagnosis and treatment of tracheal and esophageal obstruction due to congenital vascular ring, 530; intrathoracic esophagojejunostomy for lesions of upper third of esophagus, 542; arterial injuries of, 543; pharyngoesophageal diverticulum; management and complications, 543

Thread employed as suture material in stomach as possible cause of postoperative complications, 58

Thresher's lung, 234

Thrombophlebitis, Late results of femoral, and their treatment, 279

Thrombosis, Heparin in venous, 98; acute superior mesenteric artery; recovery following extensive resection of small and large intestines, 147; of iliac arteries and bifurcation of aorta, 176; results of 5 years' treatment of, and pulmonary embolism at series of Swedish hospitals during years 1940 to 1945, 179; of inferior vena cava, 581

Thumb, Reconstruction of, 169; plastic operations on, 171; indications and results of surgical reconstruction of, 573

Thymus gland, Mediastinal tumors and cysts; collective review, 195; symposium on surgical treatment of myasthenia gravis, 295; remarks concerning 39 interventions on, and parathyroid glands, 296; surgical treatment of myasthenia gravis, 505

Thyroid glands, Paraxanthine treatment of hyperthyroidism, 45; struma lymphomatosa; clinicopathological study, 126; exophthalmic goiter in males, 127; effect of thiouracil hypothyroidism on reproduction in rat, 193; treatment of hyperthyroidism with methylthiouracil, 227; more optimistic approach to cancer of, 311; studies on 2 sporadic cretinous brothers with goiter, together with some remarks on relation of hyperplasia to neoplasia, 423; complications following administration of thiouracil, 423; circulating thyroid hormone from, in blood and lymph, 530; treatment of hyperthyroidism with propylthiouracil, 530; what has thiouracil taught us about pathologic physiology of Graves' disease, 531; treatment of toxic disease of, with thiouracil, 531; exophthalmos and tissue changes in guinea pig following administration of hormone of pituitary gland stimulating, 532; malignant goiter, 532

Thyroiditis, Lymphadenoid goiter; its differentiation from chronic, 228

Thyrotoxicosis, At Ulleval hospital in years 1934-1944, with special view to frequency of disease, 309; sternal marrow studies in, treated with thiouracil and review of literature regarding thiouracil effects on blood, 310; estimation of 2-thiouracil in plasma and urine following its administration in, 531

Tibia, Intra-articular fractures in upper end of, and lower end of femur, 278

Trachea, Diagnosis and treatment of obstruction of esophagus and, due to congenital vascular ring, 539

Transfusion, Intracardiac, 96; clinical experiences with dextran as plasma substitute, 97; importance of whole blood, in management of severe burns, 182; blood, studies; differentiation of hemolytic and nonhemolytic reactions to, 281; preservation of normal human plasma in liquid state; clinical, chemical, and physicochemical studies during 3 years of storage at room temperature, 379; present status of, of whole blood and its derivatives in obstetrics and gynecology, 455; and autotransfusion of oxygenated blood in treatment of asphyxia, electrocution, drowning, and carbon monoxide poisoning, 583; use of animal plasma or serum in man; universal detoxified plasma or serum, 598

Transportation, Treatment of injuries of spinal cord; collective review, 403.

Trasentine, Treatment of radiation sickness with, and phenobarbital with; preliminary report, 397

Trauma, Pretraumatic personality and psychiatric sequelae of head injury; correlation of multiple specific factors in pretraumatic personality and psychiatric reactions to head injury, based on analysis of 101 cases, 128; crushing injuries of chest, 324; air force battle casualties; experience with acute injuries of 839 battle casualties from 8th Air Force, 385; rehabilitation of injured hand 386; probable role of reflex capillary stasis in general pathology, 597

Trench foot, Report on, and cold injuries in European theater of operations, 184

Tuberculoma, Differential diagnosis and treatment of, in lung, 137; mediastinal tumors and cysts; collective review, 195

Tuberculosis, Statistical report on 73 patients with unilateral renal, treated by nephrectomy, 80; value of urethrography in male genital, 84; clinical picture and therapy of rib, 131; laryngeal, 228; association of Brazilian blastomycosis and, in glandular lesions, 282;

course of hypertension after nephrectomy for advanced unilateral renal disease; collective review, 299; stenosis of large bronchi in course of chronic tertiary pulmonary, in adult, 317; renal, in 6 year old girl, 352; 4 cases of, of kidney, 463; costotransverse osteoarthritis due to, 471; of breast, 537; lobectomy and pneumonectomy in treatment of pulmonary, 537; surgical treatment of large cavities of superior lobe due to, 538; of penis, 568

Tumors, Parathyroid adenoma; study of 322 cases; collective review, 1; pathology and clinical symptoms of, on salivary glands, 42; bilateral mixed, of submaxillary gland, 42; inspissated blood and growth of fibromatous uterine; preliminary report, 71; associated, of genitomammary spheres, 72; paroxysmal hypertension caused by, of suprarenal medulla, 80; primary malignant bone, 87; histogenetic study of adenolymphomas, 104; results of radiotherapy of epibulbar, at Radiumhemmet, Stockholm, 1920–1940, 123; primary cystic, of diaphragm, 140; malignant testicular neoplasms, 165; origin and evolutionary cycle of giant cells of, of bone (benign variety); preliminary communication, 168; combined roentgen radiation and surgical treatment of large benign giant cell, of bone, 172; of tactile end organs, 193; mediastinal, and cysts; collective review, 195; mixed, of lip, 226; invasion of paranasal sinuses by, of meningeal origin, 231; solitary primary neurogenic, of lung, 234; partial hepatectomy in certain primary, of liver, 250; clinical picture and treatment of pheochromocytomas of suprarenal, 263; Wilms', 263; islet-cell, of pancreas with hyperinsulinism, 336; anatomical, histological, and clinical observations of ovarian, 343; gonocytoma, 347; lymphoepithelioma, 380; angiographic diagnosis of expanding intracranial lesions by vascular displacement, 390; intraocular, in soldiers, 421: histogenesis of cementoma, 422; experiences in ventriculography of, below tentorium, 424; Brodie's disease of breast, 431; association of endocervical carcinoma with fibromyoma of body of uterus, 450; of testis; report of 922 cases, 469; fibrous dysplasia of single bones (monostotic fibrous dysplasia), 471; primary lymph gland, of vascular origin—lymphangiothelioma of abdominal lymph glands, 482; induction of, in vitro with virus; experiments with rabbit skin grown in tissue culture and treated with Shope papilloma virus, 503; eosinophilia in malignant; its significance, 505; odontogenic, 530; primary intracranial neoplasms in military age group—World War II, 533; postclimacteric metrorrhagia and malignant, of ovary, 558; connective tissue, of ovary, 558; relation of, of small bowel to genital organs in female, 561

Twin, Presentations in deliveries of, 260

Tyrothricin, Antisepsis and disinfection in surgery; collective review, 107

ULCER, Problem of surgical arrest of massive hemorrhage in peptic, 59; study of time of "healing" of peptic; in series of 69 cases of duodenal and gastric craters, 60; morphology and variations of duodenal vasculature; relationship to problems of leakage from postgastrectomy duodenal stump, bleeding peptic, and injury to common duct, 60; surgical treatment of jejunal, 62; complications of chronic nonspecific colitis with, 64; study of peptic, 144; aftermath of perforated peptic, 144; peptic, of esophagus, 240: cancer with, 245; perforated gastroduodenal, 245; problems in etiology of peptic; resistance of gastrointestinal tract to digestive action of its own secretions, 246; necrosis and, of intestinal wall in simple intestinal obstruction, 246; subtotal gastrectomy for duodenal, 328; surgical treatment of bleeding peptic, 329; late results in treatment of colitis with, 332; tropical, and cutaneous diphtheria, 398; peptic, of esophagus; report of patient with 10 year follow-up, 435; pathogenesis of, 441; history of hemorrhage in peptic, 441; effectiveness of parenterally administered "enterogastrone" in prophylaxis of recurrences of experimental and clinical peptic, 540; analysis of peptic, in South Australia, based on study of 1,027 case reports, 548; conservative treatment of acute perforated peptic, 548; surgical aspects of hemorrhage from peptic, 549; insulin test for presence of intact nerve fibers after vagal operations for peptic, 549; simple jejunal, 550; primary closure of decubitus, 584; perforation of duodenal, during roentgen examination, 593

Ultraviolet light, Antisepsis and disinfection in surgery; collective review, 107

Ultraviolet rays, Effect of various doses of, on blood of infants, 481

Umbilical cord, Anatomic peculiarities of human, and their clinical significance, 462

Umbilicus, Metastases in, from tumors of female genitalia, 155

Ureter, Retrograde movement of calculi in, 83; histopathological and pathogenic study of chronic pericystitis, with special regard to lesions of terminal end of, 84; unique case of submucosal epithelial nests in, and renal pelvis, 264; instrumental perforation of, 354; vesicoureteral reflux, 465; belt for compression of, 568

Urethra, Repair of hypospadias and fistula of, 162; loss of coverage of penis, scrotum, and, 182; rupture of; new diagnostic sign, 265; repair of war wounds of bulbous and membranous, with split thickness skin grafts and penicillin, 354; female, and its relation to upper urinary tract infections, 359; traumatic rupture of bladder and posterior; 4 observations, 466

Urethritis, Abacterial pyuria presenting as, 266; significance of chronic, in women, 559

Urethrography, Value of, in male genital tuberculosis, 84

Urinary Tract, Effect of renoureteral lithiasis on upper, 80; vaginal ureterolithotomy, 81; complications in, following operation for imperforate hymen, 255; study of experimental calculi in, 268; enterococci in infections of, 269; unrecognized vesical neck obstruction in women, 345; instrumental perforation of ureter, 354; treatment of hypospadias, 355; female urethra and its relation to infections of upper, 359; surgical injuries of, 569; drainage and irrigation of 571

Urine, Studies on streptomycin; assay in body fluids, 192; studies on streptomycin; blood levels and excretion in, in man and animals, 192; abacterial pyuria presenting as "urethritis," 266

Uterus, Innervation of, 70; necrosis of fibromas and polyps of, 70; inspissated blood and growth of fibromatous tumors of; preliminary report, 71; blood vessels of human endometrium, 149; on methods of treatment in presence of pyometra, 149; total abdominal hysterectomy: study of 500 cases, 149; further experience with radiotherapy in cancer of corpus of uterus, 150; carcinoma of cervix of, in young women, 150; carcinoma of cervix, with special reference to young women, 254; statistical data obtained from the Perugia obstetrical and gynecological clinic on fibromyoma and fibromatosis of, from January 1, 1936 to December 31, 1944, 254; choriocarcinoma of, 255; influence of some sexual hormones and of cholesterin on productive phenomena in, and in mammary glands, 257; value of operation of Halban in treatment of genital prolapse in presence of large cystocele, 341: Halban's operation; anatomic study of vesicovaginal fascia, 341; adenomyosis of; study of 52 reported cases and review of literature,

342; controversial factors in management of fundal carcinoma, 342; association of endocervical carcinoma with fibromyoma of body of, 450; report of 2,798 vaginal hysterectomies, 450; study of 500 vaginal hysterectomies, 450; anomalies of contraction of, 456; surgical treatment of prolapse of, 557; surgical treatment of myomas of, with particular reference to myomectomy, 557; clinical and statistical notes on cancer of cervix of, 557; on treatment of cancer of cervix, 558

VAGINA, Ureterolithotomy through, 81; treatment of discharge from, 256; report of 2,798 hysterectomies through, 450; study of 500 hysterectomies through, 450

Varices, Treatment of esophageal, by injections of sclerosing agents through esophagoscope, 240

Veins, Multiple Perthes' test for segmental occlusion of deep, 93; ligation of inferior vena cava or iliac, 95; pseudoembolic phlebitis (Grégoire's blue phlebitis), 374; surgery of, 480; studies on use of gelatin sponge or foam as hemostatic agent in experimental liver resections and injuries to large, 505

Vena cava, Ligation of inferior, or iliac veins, 95; thrombosis of inferior, 581

Version, Internal, in Angel Custodio Sanhueza Maternity Hospital, 460

Vertebrae, Injuries of cervical, 535

Virus, Induction of neoplasia in vitro with; experiments with rabbit skin grown in tissue culture and treated with Shope papilloma, 503

Vitallium, Accidental section of hepatic ducts; ligation of right duct and anastomosis of left to common duct over tube of, 67

Vitamins, Prevention of hemorrhagic complications in biliary surgery by, (K), 146; pyridoxine hydrochloride (vitamin B_6) in control of radiation sickness; preliminary report, 397

Volkmann's syndrome, Of upper extremity; technique of explorative operation, 472; contribution to pathogenesis of, (ischemic), 573; contusion of humeral artery; spasm of vessels, 573

Vomiting, Nausea and, of pregnancy; study in psychosomatic and social medicine, 259; question of cerium oxalate as prophylactic against postoperative, 288

Vossius ring, Observations on, 42

Vulva, Prevention and treatment of carcinoma of, 255

WAR, Chest wounds in battle casualties, 51; gunshot wounds of urinary bladder in, 84; management of intraocular foreign bodies in military practice, 122; studies on dark adaptation in military personnel complaining of "night blindness," 122; treatment of penetrating wounds of brain produced by missiles of, 128; injuries of chest in, 133; thoracoabdominal casualty, 135; management of thoracic and thoracoabdominal wounds in forward areas in Sicilian and Italian campaigns, 136; wounds of arteries in, 174; report of trench foot and cold injuries in European theater of operations, 184; rehabilitation of surgical patient in army hospitals in World War II, 191; atresia of external auditory canal occurring in military service; report on correction of condition in 10 cases, 224; 2 unusual cases of, wounds of heart, 237; treatment of bone defects of upper extremities in casualties of, 274; activities in, of National Research Council and Committee on Medical Research, with particular reference to team work on studies of wounds and burns, 284; initial surgery of thoracoabdominal injuries of, 325; definitive surgery of large intestine following wounds of, 330; wounds of abdomen; review of 131 cases, 337; injuries to genitourinary tract in European theater of operation, 359; orthopedic surgery in European theater of operations, 372; surgical lessons of last 5 years of, and their application to surgical practice after, 383; frostbites sustained in, 384; Air Force battle casualties; experience with acute injuries of 839 battle casualties from 8th Air Force, 385; intraocular tumors in soldiers, 421; primary intracranial neoplasms in military age group—World War II, 533; facial nerve surgery in European theater of operations, 534

Water, Discussion on metabolism of, in pregnancy, 156

Weight, Relationship of maternal gain of, to, of newborn infant, 461

Whipple's lipodystrophy of intestines, 330

Wilms' tumor, 263

Wounds, Gunshot, of urinary bladder in wartime, 84; antisepsis and disinfection in surgery; collective review, 107; war, of arteries, 174; technique of immediate restoration of vascular continuity after arterial, 175; skin dressings in treatment of débrided, 181; wartime activities of the National Research Council and Committee on Medical Research; with particular reference to team work on studies of, and burns, 284; penicillin in exudates of, 285; penicillin-resistant staphylococci in; report based on study of 59 cases of infected war, 286; fibrosarcoma of Darier occurring after bite, 296; causes of, and indications for re-operation following gunshot, of chest, 326; definitive surgery of large intestine following war, 330; treatment of penetrating, of abdomen in civilian practice, 336; 524 abdominal, on Western Front, 338; repair of avulsion, of hands and feet by flap graft technique, 381; frostbites sustained in war, 384; Air Force battle casualties; experience with acute injuries of 839 battle casualties from 8th Air Force, 385; postoperative infection of; evaluation of factors concerned with resistance of tissues to infection, 388; studies on effects of adult animal tissue extracts on healing of, 504; gas gangrene; collective review, 507

Wrist, Fractures of carpal scaphoid bone; analysis of 66 cases 277; changes in bones of, in workers with pneumatic tools, 472; recurrent dislocation of first carpometacarpal joint repaired by functional tenodesis, 477; operation for nonunion of fractures of carpal navicular, 477; surgery of spastic deformity of, and hand, 576; end-results of bone grafting for nonunion of carpal navicular, 579

XANTHOMA, Polycystic, of meniscus, 169; mediastinal tumors and cysts; collective review, 195

Z-PLASTIC operation, Present evaluation of merits of, 78
